REOLIREMENTS REGARDING EXPOSLIRE TO RADIO WAVES

(Recommendation 1999/519/EC) (2)

These limits are part of a set of requirements and establish authorised. Your telephone is equipped with a built-in antenna. For optimal operation, you should radiofrequency levels for the public. These limits were established by independent avoid touching it or degrading it. groups of experts on the basis of regular and detailed scientific assessments. They As mobile devices offer a range of functions, they can be used in positions other than include a significant safety margin intended to ensure the safety of all, regardless of against your ear. In such circumstances the device will be compliant with the Declaration of Conformity for your telephone can be obtained

known as the Specific Absorption Rate or "SAR"The SAR limit is set by international positions the phone at least 2cm away from the body. requirements or by the Council of the European Union at 2 watts/kilogram (W/kg) • LICENCES averaged over 10 grams of body tissue. The tests used to determine SAR levels were carried out on the basis of standard usage modes with the phones transmitting at their maximum power level over the entire range of frequency bands.

Although the SAR was established at the highest certified level, the actual SAR level for the mobile phone during use is generally much lower than the maximum values In fact since mobile phones are designed to operate at many different power levels they only use the minimum level of power required to provide a connection to the network. In theory, the closer you are to a base station antenna, the lower the power level required by the mobile phone.

- The ICNIRP requirements are applicable in the following regions Central America (except Mexico), South America, North and South Africa, Pacific Asia (except Korea), Australia.
- The European recommendation (1999/519/EC) is applicable in the following regions: Europe, Israel.

The highest tested SAR value for this mobile phone for use at the ear and General information se note that you must respect the laws and regulations in force in your Mains powered chargers will operate within the temperature range of: 0°C to 40°C. compliance against the standard is 1.13 W/kg (OT-105), 1.0 W/kg (OT-108).
