Safety and Use

We recommend that you read this chapter carefully before using your phone. The manufacturer disclaims any liability for damage, which may result as a consequence of improper use or use contrary to the instructions contained herein.

• **TRAFFIC SAFETY:**

Given studies, which show that using a mobile phone while driving a vehicle constitutes a real risk, even when the hands-free kit is used (car kit, headset...), drivers are requested to refrain from using their mobile when the vehicle is not parked.

When switched on, your phone emits electromagnetic waves that can interfere with the vehicle's electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:

- do not place your phone on top of the dashboard or within an airbag deployment area,
- check with your car dealer or the car manufacturer to make sure that the dashboard is adequately shielded from mobile phone RF energy.

• **CONDITIONS OF USE:**

Switch the phone off before boarding an aircraft to avoid prosecution.

Switch the phone off when you are in health care facilities, except in designated areas. As with many other types of equipment now in regular use, mobile telephones can interfere with other electrical or electronic devices, or equipment using radio frequency.

Switch the phone off when you are near gas or flammable liquids. Strictly obey all signs and instructions posted in a fuel depot, petrol station, or chemical plant, or in any potentially explosive atmosphere.

When the phone is switched on, it should be kept at least 15 cm from any medical devices such as a pacemaker, a hearing aid or insulin pump, etc. In particular when using the phone, you should hold it against the ear on the opposite side to the device, if any.

To avoid hearing impairment, pick up the call before holding your phone to your ear. Also move the handset away from your ear while using the "hands-free" mode because the amplified volume might cause hearing damage.

Do not let small children use the phone without supervision.

When replacing the cover please note that your phone may contain substances that could create an allergic reaction.

Always handle your phone with care and keep it in a clean and dust-free place.

You are advised to switch off the telephone from time to time to optimise its performance.

Do not allow your phone to be exposed to adverse weather or environmental conditions (moisture, humidity, rain, infiltration of liquids, dust, sea air, etc). The manufacturer's recommended operating temperature range is -20°C to +55°C. Over 55°C the legibility of the phone's display may be impaired, though this is temporary and not serious.

Do not open or attempt to repair your mobile phone yourself.

Do not drop, throw or bend your mobile phone.

Do not paint it.

Use only Alcatel batteries, battery chargers, and accessories that are compatible with your phone model. (See Accessories List, page 55). T&A Mobile Phones Limited and its affiliates disclaim any liability for damage caused by the use of other chargers or batteries.

Your phone should not be disposed of in a municipal waste. Please check local regulations for disposal of electronic products.

Remember to make back-up copies or keep a written record of all important information stored in your phone.

Some people may suffer epileptic seizures or blackouts when exposed to flashing lights, or when playing video games. These seizures or blackouts may occur even if a person never had a previous seizure or blackout. If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult your doctor before playing video games on your phone or enabling a flashing-lights feature on your phone. Parents should monitor their children's use of video games or other features that incorporate flashing lights on the phones. All persons should discontinue use and consult a doctor if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. To limit the likelihood of such symptoms, please take the following safety precautions:

- Do not play or use a flashing-lights feature if you are tired or need sleep.
- Take a minimum of a 15-minute break hourly.
- Play in a room in which all lights are on.
- Play at the farthest distance possible from the screen.

When you play games on your phone, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, or other musculoskeletal disorders:

- Take a minimum of a 15 minute-break every hour of game playing.
- If your hands, wrists, or arms become tired or sore while playing, stop and rest for several hours before playing again.
- If you continue to have sore hands, wrists, or arms during or after playing, stop the game and see a doctor.

This symbol on your telephone, the battery and the accessories means that these products must be taken to collection points at the end of their life:

- Municipal waste disposal centres with specific bins for these items of equipment
- Collection bins at points of sale.

They will then be recycled, preventing substances being disposed of in the environment, so that their components can be reused.

In European Union countries:

These collection points are accessible free of charge. All products with this sign must be brought to these collection points.

In non European Union countries:

Items of equipment with this symbol are not to be thrown into ordinary bins if your country or your region has suitable recycling and collection facilities; instead they are to be taken to collection points for them to be recycled.

• BATTERY:

Before removing the battery from your phone, please make sure that the phone is switched off. Observe the following precautions for battery use:

- Do not attempt to open the battery (due to the risk of toxic fumes and burns).
- Do not puncture, disassemble or cause a short-circuit in a battery,
- Do not burn or dispose of a used battery in household rubbish or store it at temperatures above 60 °C.

Batteries must be disposed of in accordance with locally applicable environmental regulations. Only use the battery for the purpose for which it was designed. Never use damaged batteries or those not recommended by T&A Mobile Phones Limited and/or its affiliates.

• CHARGERS:

Mains powered chargers will operate within the temperature range of: 0 °C to 40 °C. The chargers designed for your mobile phone meet with the standard for safety of information technology equipment and office equipment use. They should be used for this purpose only.

• RADIO WAVES:

Proof of compliance with international standards (ICNIRP) or with European Directive 1999/5/EC (R&TTE) is required of all mobile phone models before they can be put on the market. The protection of the health and safety for the user and any other person is an essential requirement of these standards or this directive.

THIS MOBILE PHONE COMPLIES WITH INTERNATIONAL AND EUROPEAN REQUIREMENTS REGARDING EXPOSURE TO RADIO WAVES.

Your mobile phone is a radio transmitter/receiver. It was designed and manufactured to comply with the radiofrequency (RF) exposure thresholds recommended by international requirements (ICNIRP) ⁽¹⁾ and by the Council of the European Union (Recommendation 1999/519/EC) ⁽²⁾.

These limits are part of a set of requirements and establish authorised radiofrequency levels for the public. These limits were established by independent groups of experts on the basis of regular and detailed scientific assessments. They include a significant safety margin intended to ensure the safety of all, regardless of age or state of health.

The exposure standard for mobile phones is determined by a measurement unit known as the Specific Absorption Rate or "SAR". The SAR limit is set by international requirements or by the Council of the European Union at 2 watts/kilogram (W/kg) averaged over 10 grams of body tissue. The tests used to determine SAR levels were carried out on the basis of standard usage modes with the phones transmitting at their maximum power level over the entire range of frequency bands.

Although the SAR was established at the highest certified level, the actual SAR level for the mobile phone during use is generally much lower than the maximum values. In fact, since mobile phones are designed to operate at many different power levels, they only use the minimum level of power required to provide a connection to the network. In theory, the closer you are to a base station antenna, the lower the power level required by the mobile phone.

The highest tested SAR value for this mobile phone for use at the ear and compliance against the standard is 1.0 W/kg. While there may be differences between the SAR levels on various phones and at various positions, they all meet the relevant International guidelines and EU requirements for RF (radio-waves) exposure.

The World Health Organisation (WHO) considers that present scientific information does not indicate the need for any special precautions for use of mobile phones. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using "hands-free" devices to keep mobile phones away from the head and body (fact sheet n° 193). Additional information about electromagnetic fields and public health are available on the following site: <http://www.who.int/peh-emf>.

Your telephone is equipped with a built-in antenna. For optimal operation, you should avoid touching it or damaging it.

- (1) The ICNIRP requirements are applicable in the following regions: Central America (except Mexico), South America, North and South Africa, Pacific Asia (except Taiwan and Korea), Australia.
- (2) The European recommendation (1999/519/EC) is applicable in the following regions: Europe, Israel.

General information

- **Website:** www.tcl-ta.com
- **Wap address:** wap.my-onetouch.com
- **Hot Line Number:** see the "T&A Mobile Phones Services" leaflet or go to our Internet site.

On our Internet site, you will find our FAQ (Frequently Asked Questions) section. You can also contact us by e-mail to ask any questions you may have.

Your telephone is a transceiver that operates on GSM networks with 900 and 1800 MHz bands.

The **CE** marking indicates that your telephone complies with "1999/5/EC (R&TTE)" directive and that the accessories concerned comply with current EC directives. The entire copy of the Declaration of Conformity for your telephone can be obtained through our website: www.tcl-ta.com.

T9 Text Input is licensed under one or more of the following: U.S. Pat. Nos. 5,187,480, 5,818,437, 5,945,928, 5,953,541, 6,011,554, 6,286,064, 6,307,548, 6,307,549, and 6,636,162, 6,646,573; European Pat. Nos. 0 842 463 (96927260.8), 1 010 057 (98903671.0), 1 018 069 (98950708.2); and additional patents are pending worldwide

Protection against theft ⁽¹⁾

Your telephone is identified by an IMEI (phone serial number) shown on the packaging label and in the product's memory. We recommend that you note the number the first time you use your telephone by entering *, #, 0, 6, # and keep it in a safe place. It may be requested by the police or your operator if your telephone is stolen. This number allows your mobile telephone to be blocked preventing a third person from using it, even with a different SIM card.

Disclaimer

There may be certain differences between the user manual description and the phone's operation, depending on the software release of your telephone or specific operator services.

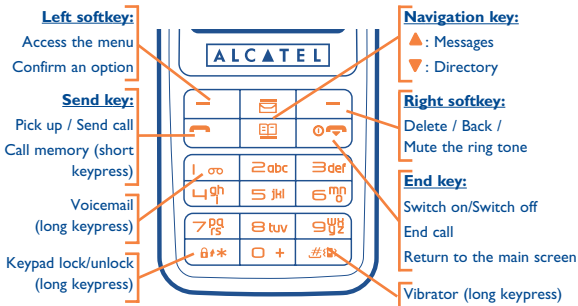

July 2005

⁽¹⁾ Contact your network operator to check service availability.

⁽²⁾ OT-EI57/158/252.

2 Getting started

2.1 Set-up

Inserting the SIM Card ⁽¹⁾

You must insert your SIM card in order to use your phone. To insert your SIM card, turn off your phone by holding down the  key.

OT-E157/158/252

Fit the SIM card with the chip facing downwards. Slide the SIM card into its compartment. Push the SIM card with your finger to release it.

OT-E159/160/161/
256/257/259

Inserting and removing the battery

Align the tab on top of the battery with the slot in the battery compartment of your phone. Press down the battery until the latch is securely in place.

- ⁽¹⁾ Check with your network operator to make sure that your SIM card is 3V compatible. The old 5 Volts cards can no longer be used. Please contact your operator.

Charging the battery

OT-E157/158/252

Connect
the charger

OT-E159/160/161/256/
257/259

- An animation will be on while charging.
- It may take several minutes before the charging starts.
- Do not force the plug into the socket.
- The battery icon will take several minutes before the level is shown.
- Before connecting to the charger, make sure the battery is inserted correctly.
- The mains socket must be near to the phone and easily accessible (avoid power extension cables).
- Before using your phone for the first time, fully charge your battery (approximately 3 hours). Only use Alcatel chargers. We recommend charging the battery once a day so that the phone operates at an optimum level. You are advised to fully charge the battery (🔋).

Precautions during use

Your telephone is equipped with a built-in antenna. For optimal reception and operation, do not touch the upper part of your telephone.

Remove the back cover

Replace the back cover

2.2 Switching your telephone ON

Hold down the  key. A welcome animation is displayed for 2 seconds. Type your PIN code if necessary, then confirm with the left softkey.

If you do not know your PIN code or if you have forgotten it, contact your network operator. Do not leave your PIN code near your telephone. It should be stored in a safe place when not needed.

2.3 Switching your telephone OFF

From the main screen, press the  key (long keypress).

3

Calls

3.1 Making a call

Dial the desired number then press the  key to place the call. To hang up, press the  key.

If you make a mistake, press the right softkey once to remove the last digit. Press and hold the key to delete all the digits.

To enter “+” or “P” (pause), hold down the  + key.

Making an emergency call

In an emergency, dial **112** or any other number provided by your network operator. Press the  key.

Emergency calls can be performed at any time without your SIM card or PIN code. Once the call has been made, the screen will display: “**SOS**”.

Making an international call

Hold down the  + key. When “+” is displayed, enter the country and area codes, then complete the number and send the call.

Calling a number from the directory

Press the  key to access the directory. Select the desired phone number and press  (see “**Directory**” on page 29).

Automatic redial

If this feature is activated, the person you are unable to reach will be called back automatically.

3.2 Calling your voicemail ⁽¹⁾

Your voicemail is provided by your network so that you do not miss any calls: it works like an answering machine that you can consult at any time.

To access your voicemail from the main screen, make a long keypress on the  key.

If the access number for your operator’s voicemail service does not appear, dial the number that you were given. To program or change this number at a later date, refer to “**Call services/Voicemail/Voicemail nber**” (see page 42).

To use your voicemail service from abroad, contact your network operator before leaving.

⁽¹⁾ Contact your network operator to check service availability.

3.3 Receiving a call

When you have an incoming call, your phone rings and/or vibrates depending on the parameters chosen.

- To pick up a call, press the  key ⁽¹⁾.
- To reject a call, press the  key.
- To mute the ring, press the right softkey ⁽¹⁾.

The number of the calling party is displayed if transmitted by your network and if the service is subscribed. However, if the number has been stored in your directory, the caller's name will be displayed.

⁽¹⁾ For OT-E159/160/161/256/257/259, you can answer by opening the flip or end the call by closing the flip provided that you have selected the option in the menu “**Answer mode**” (see page 41).

3.4 Available functions during the call

You can access the following options during a call by pressing the left softkey:

- Hold/Retrieve**
 - Hold the current call to take a second incoming call.
- Mute/Unmute**
 - Activate/deactivate the microphone.
- Directory**
 - Access the directory.
- Messages**
 - Access the messages.
- Switch**
 - Switch from one call to another.
- StartConference**
 - Speak to several people at the same time.
- End held call**
 - End the call you have put on hold.
- End all calls**
 - End all the calls.
- Private call**
 - Private call with one member of the conference only.
- Remove**
 - Remove a member from the conference.
- Add conference**
 - Add a member to the conference.

You can adjust the sound level during a call using the navigation  key.

3.5 Call waiting ⁽¹⁾

If a second call comes in while you are on line, you will be notified by a tone and the backlight. You can then accept the call by pressing the  key. Your first call will be automatically put on hold. You can then switch between your two correspondents by pressing the “**Options**” softkey and by selecting the “**Switch**” option in the menu.

3.6 Making a second call

To call a second party during a call, dial the number or select it from the directory by accessing the menu, then press the  key to send the call.

3.7 Conference call ⁽¹⁾

Your phone allows you to talk to several people at the same time.

When on a double call, press the left softkey “**Options**” and select “**Start Conference**”. If a third call comes in, answer it by pressing the  key; to add it in your conference select “**Add conference**” in the options, then confirm by pressing the left softkey.

The “**Remove**” option allows you to disconnect a member from the conference. If you select “**Private call**” you can have a private call with one member only (other members are put on hold). You can end either the current call: “**End call**”, or the calls put on hold: “**End held call**” or at the end of the conference all the calls: “**End all calls**”.

⁽¹⁾ Contact your network operator to check service availability.

4 Menu

4.1 Accessing the menu

From the main screen, press the left softkey, the menu is displayed as a list with small icons beside each function.

Select the item you require using the navigation keys (▲, ▼), then press again the left softkey to confirm.

4.2 Organising functions

For each of the listed functions, refer to the appropriate chapter in this User Guide.

Directory:

Access/create directory files and make calls from your directory.

Messages:

Read, write and send your SMS. View your messages in your inbox, outbox. Adjust the settings and activate/deactivate SMS CB message reception.

Sounds:

Change the mode, volume, ringtones, alerts, ON/OFF sounds, key beep.

Display:

Change the main screen wallpaper ⁽¹⁾, colours ⁽¹⁾/reverse video ⁽²⁾, ON/OFF screens, screensaver ⁽¹⁾ and contrast.

Settings:

Set the time, date, language, security mode, answer mode, etc

⁽¹⁾ OT-E252/256/257/259.

⁽²⁾ OT-E157/158/159/160/161.

**Call services:**

Access functions such as: voicemail number, call memory, call settings, network, forward and call barring.

**Games:**

Play the 2 games embedded in your telephone.

**Tools:**

Access the Alarm and Calculator functions.

**Service:**

Access the Operator services ⁽¹⁾.

⁽¹⁾ Depending on your operator's network.

5 Directory

The directory allows you to store phone numbers and names (or files) either in the SIM memory and/or the phone memory. You may store up to 250 entries in the phone memory.

5.1 Directory menu

- View** • Access the list of contacts (alphabetic order).
- Create** • Enter number and name of a new contact.
- Delete** • Delete the selected contact.
- Copy** • Copy the selected contact from the Sim memory to the phone memory and vice versa.
- Caller group** • Group together names by category.
- Select dir.** • Select the SIM directory, Phone directory or both at the same time.
- Mem. status** • Check the number of contacts and the memory space left.
- My number** • Enter your own phone numbers for future reference.

5.2 Consulting your directory (“View”)

From the main screen, select “**Directory**” then “**View**” to access the list of your contacts. The names are sorted in alphabetical order.

5.2.1 Available options in the contacts list

Once you have selected a name, press the left softkey to access the following options:

- Call number** • Call the number you have selected.
- Send message** • Create a message to send to the selected contact.
- Details** • Display the name and phone number.
- Modify** • Modify the data of the selected contact.
- Delete** • Delete the selected contact.
- Copy** • Copy the file to the phone or SIM directory.
- Caller group** • Add the selected contact to a particular group (family, friends, office, ...).
- Search by nber** • Search by entering a particular phone number.

5.2.2 Making the call

Press the  key when the name is selected to make a call or select “**Call number**” in the options menu.

5.2.3 Caller group

You can group together names by category (family, lover, friends, office, business, other) and select a special ringtone. For each group, you can select the following options:

- Modify** • Change the name of the group.
- Ringtone** • Set a special ringtone for that group.
- SMS alert** • Set a special SMS tone for that group.
- Members** • View the members in that group.
- Add member** • Add a new group member.
- Delete all** • Delete all the members in this group.

5.2.4 Searching for a name by its first letter

You can search for the person's name by pressing the key associated with the first letter of his/her name. For instance, if you press **abc** twice, names starting with "B" will be displayed.

6 Messages

From your telephone, you can read, write, send and receive SMS messages and share them with other mobiles.

To access the messages from the main screen, press the top of the  key or press the left softkey and select the  (“**Messages**”) icon.

6.1 Create an SMS

In the “**Messages**” menu, select “**Create**” and enter your message. Press the left softkey to access the following list:

- Send**
 - Send the message to a recipient.
- Send to many**
 - Send the message to a group of people you have defined.
- Send to email ⁽¹⁾**
 - Send a message to an email address.
- Save**
 - Save the message in the unsent box and send it later.
- Predefined**
 - Use or modify an existing message.
- Discard**
 - Discard the message.
- Predictive (T9)**
 - Select this mode to enter the words more quickly.

⁽¹⁾ Contact your network operator to check service availability.

Symbols

- Add symbols.

I23

- Switch to numeric mode.

T9 help

- Help menu for the predictive mode.

Languages

- List of languages.

My words

- Add a word to your dictionary.

Next word On/Off

- If activated, the system displays the next most appropriate word in your sentence.

Word compl.

- If activated, the system will complete the word automatically; if deactivated, you will have to enter all the letters of the word but just one key press per letter.

On/Off

6.2 Inbox/Outbox

In the Inbox, read and unread messages are shown with different icons.

The Outbox includes sent and unsent messages.

Select the message you want to read and then press the left softkey to access the following options:

- Reply** • Reply to the sender of the message by SMS.
- Delete** • Delete the message.
- Forward msg** • Forward the message received to other people.
- Archives** • Archive your messages in the telephone memory.
- Modify** • Modify the message selected then send or save it.
- Extract nber** • Save or use the number contained in the message.
- Call number** • Call back the sender of the message.

6.3 Archives

This feature contains inbox, sent and unsent messages stored in the telephone memory to save memory space in the SIM card. The options are approximately the same as inbox/outbox folder.

6.4 Predefined

A list of predefined messages are available. Select one, edit it if required, and then send it.

6.5 Delete

Delete either all the Inbox, or all Sent, or all Unsent or all Archives, or all messages at once.

6.6 Settings

You can change the message settings:

- SceCentre**
 - The phone number of your operator's service centre (it may be provided automatically).
- Email ctre** ⁽¹⁾
 - The number of the server for sending emails.
- Validity**
 - Set the time period during which attempts to send the message to the recipient will be repeated in case of failure.
- Deliv. report**
 - Request for acknowledgement of receipt for each message sent.

6.7 SMS CB ⁽¹⁾

These are messages broadcast over the network (weather, traffic, etc..). You can decide to receive them or not. Press the left softkey to access the following options:

- Activate**
 - Activate/deactivate the reception of broadcast messages.
- Read**
 - View the received channel messages.
- NewCBcod.**
 - Add a new channel ID obtained from your service provider.
- List**
 - List of the available channels (you can modify or delete one of them).

⁽¹⁾ Contact your network operator to check service availability.

7 Sounds ⁽¹⁾

From the main screen, press the left softkey to access the menu then select the  icon and select one of the following options in order to customise your telephone.

7.1 Mode

Ringtone

- Only the tone is played.

Vibrator

- Only vibrator is set (but the alarms and low battery sound will be played anyway).

Vibrator+ring

- Vibrator and tone at the same time.

Vibr.then ring

- Vibrator then tone.

Vibr.Beep.Ring

- Vibrator then warning beep, then tone.

Silence

- No sound nor beep (but the alarms and low battery sound will be played anyway).

7.2 Volume

The volume can be adjusted to one of the levels proposed.

7.3 Ringtone

Select a melody to assign to an incoming call.

⁽¹⁾ For the clamshell phones (OT-E159/160/161/256/257/259), when the flip is closed, only the lightbar will show new SMS, incoming calls, network status, and alarms.

7.4 Alerts

SMS alert, ON/OFF sound, Alarm sound: for these sound alerts, you can select a melody to be assign to.

7.5 Key beep

Activate/deactivate the beep played with each keypress.

8 Display

8.1 Wallpaper ⁽¹⁾

◆: Select the image you wish to be displayed as the idle screen.

8.2 ON/OFF screens

Select the desired animation as welcome or goodbye screen.

8.3 Colors ⁽¹⁾

Choose different colors for the presentation of the screen.

Reverse display ⁽²⁾

Change the black and white effect of your screen.

8.4 Screensaver ⁽¹⁾

Activate or deactivate this mode to save the battery. The screen will be dark, sharing only time/network/battery information.

8.5 Contrast

Set the contrast of your telephone by choosing one of the 5 levels proposed.

⁽¹⁾ OT-E252/256/257/259.

⁽²⁾ OT-E157/158/159/160/161.

9 Settings

9.1 Clock

Set time and date, time format, date format, display (show or hide the clock).

9.2 Languages

This feature allows to choose the language in which the messages will be displayed. You may, however, choose another language if available.

9.3 Security

This function allows you to prevent unauthorised use of your telephone. Select this function to access the following options:

PIN codes:

Activate/deactivate/change the PIN 1 code (Personal Identification Number). PIN1 code will be requested each time you switch on your telephone.

The PIN2 code allows you to activate or deactivate certain functions, such as Billing etc..

If you enter an incorrect PIN code three times in a row, your SIM card will be blocked. You will then have to enter a PUK (PIN Unblocking Key) code, which you can obtain from your network operator.

Phone code:

A telephone protection code will be requested each time the phone is switched on if this code is activated.

FDN:

This feature allows you to restrict the outgoing calls to a limited set of people. You must enter your PIN2 code first.

9.4 Auto power

This function enables the automatic switch ON/OFF if you have preset a time.

9.5 Light alert ⁽¹⁾

If this function is activated, a specific led is displayed on the flip for the following events: message reception, incoming call, network, alarm.

The option “**Deactivate**” will deactivate all leds.

⁽¹⁾ OT-EI59/160/161/256/257/259.

9.6 Answer mode

Keypad answer ⁽¹⁾

- **Send key:** answer the incoming call by pressing the  key.
- **Auto>headset:** when the headset is plugged in, calls will be answered directly. If the option is selected and the headset is not plugged in, you will have to answer by pressing the  key.
- **Any key:** answer the call by pressing any key.

Flip answer ⁽¹⁾

Answer by opening the flip.

9.7 Factory reset

Reset the default factory settings.

9.8 Dictionary

Create, modify, or delete a word in your personal dictionary. When creating a SMS, the words of this dictionary are automatically called if you choose the Predictive Mode (T9).

⁽¹⁾ OT-E159/160/161/256/257/259.

10 Call services

10.1 Voicemail

Call or modify the number of your voicemail. If no voicemail number is set, contact your operator to obtain this number.

10.2 Call memory

From the main screen, press the  key and your phone displays a call list. Each call is displayed with an icon indicating the type of the call (Missed calls, Incomg. calls, Outgoing calls).

Select a telephone number in the list and press the  key to redial it or press the left softkey to access the following options:

- Details** • Display the information of the call selected.
- Save number** • Store the number in your directory.
- Send message** • Create an SMS.
- Call number** • Call the selected number.
- Modify** • Modify the number, then call it or save it.
- Delete** • Delete the number selected.
- Delete all** • Delete the entire list.

10.3 Call settings

Minute alert

Activate/cancel the sounding of a beep during a call.

Call waiting ⁽¹⁾

Activate/cancel/check the tone that notifies a second incoming call.

Auto redial ⁽¹⁾

This option enables automatic callback of the last dialed busy number, if it is activated.

Billing

Calls duration

- Last call
 - Incomg. calls
 - Outgoing calls
 - Total calls
 - Reset
- Last call duration.
 - Total incoming calls duration.
 - Total outgoing calls duration.
 - Total incoming and outgoing calls duration.
 - Reset respectively the call timer for last call, incoming or outgoing calls or total calls.

⁽¹⁾ Contact your network operator to check service availability.

Calls cost ⁽¹⁾

- Remain. credit
 - Unit cost
 - Max. credit
 - Last call cost
 - Total cost
 - Reset
- Display the remaining credit.
 - Enter the currency and Telecom unit.
 - Set a maximum credit beyond which all charged calls will be barred.
 - Cost of the last call made.
 - Cost of the last calls made.
 - Reset the cost counter (first enter PIN2).

Hide my ID ⁽¹⁾

If you choose "**Activate**", you will hide your identity (or your telephone number) from the person you are calling.

⁽¹⁾ Contact your network operator to check service availability.

10.4 Select network

Automatic

The phone automatically selects one of the networks available in the area.

Manual

Select a network that has a roaming agreement with your home network operator.

Preferred list

Create a list of networks to which you wish to be connected as a priority. A list will be displayed.

10.5 Call forward (“Forward”)

This function enables you to activate/cancel or check the call forwarding of the incoming calls of voice/fax/data calls to the voicemail or any specified number (enter the number or select the name and confirm with the left softkey). The following options are available:

- Unconditional**
 - Systematic forwarding of all your calls. The  icon is displayed on the idle screen.
- Conditional**
 - If your line is busy, if you don't answer or if you are outside the network range.
- If busy**
 - Only if your line is busy.
- If no reply**
 - Only if you do not answer.
- If unreachable**
 - Only if you are outside the range of the network.
- Status**
 - See the current setting.
- Cancel all**
 - All call forwarding is cancelled.

10.6 Call barring ⁽¹⁾

- | | |
|-----------------------|---|
| Outgoing calls | <ul style="list-style-type: none">• All outgoing calls are barred. |
| International | <ul style="list-style-type: none">• Outgoing international calls are barred. |
| Int. but home | <ul style="list-style-type: none">• Outgoing international calls except those to your country of subscription are barred. |
| Incoming | <ul style="list-style-type: none">• All incoming calls are barred. |
| If abroad | <ul style="list-style-type: none">• Incoming calls are barred when you are abroad. |
| Status | <ul style="list-style-type: none">• See the actual setting. |
| Cancel all | <ul style="list-style-type: none">• Cancel all call barring. |
| Change pswd | <ul style="list-style-type: none">• Change the password. |

⁽¹⁾ Contact your network operator to check service availability.

Games.....

11.1 Russia

The aim of this game is to make as many complete lines of bricks as possible.

Key functions:

⌘ abc rotate the brick

⬅️ move left

➡️ move right

⌘ tuv drop the brick

⌘ ** toggle the upgrade level flag; if the flag is on, the game level will move up when your score increases 300. The level impacts the speed of the bricks: the higher the level, the higher the speed.

right softkey pause and context menu

11.2 Bricks

The aim of this game is to break as many bricks as possible with a bat and ball.

If you miss a ball, you lose a life : you have 3 lives per game by default.

There are different types of bonus depending on the position in which the ball hits the bricks.

Key functions:

←	move left, shoot first ball
→	move right, shoot first ball
↵	shoot the ball
right softkey	pause and context menu

11.3 Available options

Press the right softkey to pause the game and access the following menu:

New game	<ul style="list-style-type: none">• Play a new game.
Resume game	<ul style="list-style-type: none">• Continue the game.
Options	<ul style="list-style-type: none">• Access the level and mode options.
Top score	<ul style="list-style-type: none">• Access your best scores.
Help	<ul style="list-style-type: none">• Access the help menu.

12 Tools

12.1 Alarms

Your telephone has an alarm facility. When the alarm rings, you can either snooze the alarm by pressing the left softkey “**Snooze**”. The alarm will ring again after 5 minutes. To stop it permanently, press the right softkey “**Cancel**”.

When the phone is switched off, the alarm will still ring. Press any key to mute the alarm.

For OT-EI59/160/161/256/257/259, open the flip to mute the sound.

12.2 Calculator

Enter a number and select the type of operation to be performed using the navigation key. Confirm with the left softkey.

3 Character table

To enter a word in normal mode, press the key corresponding to the desired letter several times until the letter appears.

Key	Upper case	Lower case
∞	. , - ? ! ' @ : 1	. , - ? ! ' @ : 1
z abc	A B C 2 Ä Å Æ Ç	a b c 2 ä å æ ç
≡ def	D E F 3 È É Ê Ë Ì	d e f 3 è é ê ë ì
↳ gh	G H I 4 Ğ Ğ Î Ï	g h i 4 ğ ğ î ï
≡ jkl	J K L 5 Ķ Ļ Ľ Ŀ	j k l 5 ķ ľ ł ŀ
≡ mno	M N O 6 Ñ Ñ Ò Ó Ø	m n o 6 ñ ñ ò ó ø
↳ pqr	P Q R S 7 Ŕ Ŕ Š Š	p q r s 7 ŕ ŕ š š
≡ tuv	T U V 8 Ţ Ţ Û Ü	t u v 8 ț ț û ü
≡ wxyz	W X Y Z 9 Ý Ž Ž Ž	w x y z 9 ý ž ž ž
□ +	Short keypress : select next word in the dictionary (predictive mode); Long keypress: Input the digit "0".	
⊕ *	Short keypress: Switch between normal mode (ABC) (⊕AbI > ⊕ABI > ⊕abI) to T9-predictive mode (⊕AbI > ⊕ABI > ⊕abI) Long keypress: Display the symbols table	
⊕ ⊕	Short keypress: Validate the focused word and/or insert a space Long keypress: Add a word	

This table is given for information purposes only. It may vary depending on the language and the model.

The predictive mode allows you to type your messages more quickly without the need to press the same key several times.

Simply press once the key corresponding to the letter you need, and the phone will suggest the most common words from the dictionary.

The word may change as you type - don't worry about what's on the screen until after you finish the word. Confirm the suggested word by pressing the  key.

If the finished word is wrong, use the  + key to cycle through other words in the dictionary. If your word is missing, add it using the normal mode (ABC).

Symbols bar

Hold down the  key to display the symbols bar.

Press the  key to go left,

Press the  key to go right.

Press the left softkey to confirm and insert the symbol.

4 Telephone warranty

Congratulations on choosing this mobile phone - we hope that you will be completely satisfied with it.

Your phone is guaranteed against any deviation from technical specifications for a period of twelve (12) months from the date specified on your original invoice ⁽¹⁾.

The warranty terms defined in the manual also apply to the battery and accessories but for a period of six (6) months ⁽²⁾ from the date of purchase shown on your original invoice.

Under the terms of this warranty, you must inform your vendor (or any maintenance centre approved by T&A Mobile Phones Limited or its affiliates, which are listed on our website www.tcl-ta.com) without delay, of any defect and present the invoice given to you at the time of purchase.

The vendor or maintenance centre will decide whether to replace or repair, as appropriate, all or any part of the telephone or accessory found to be defective; this warranty covers the cost of parts and labour but excludes any other costs. Repair or replacement may be carried out using reconditioned components offering equivalent functionality.

Servicing under the terms of this warranty, especially repair, modification or replacement of products, shall entitle to a THREE (3) month warranty unless there are statutory provisions to the contrary.

This warranty shall not apply to damage or defects to your telephone and/or accessory caused by:

- 1) failure to follow the instructions for use or installation,
- 2) failure to comply with technical and safety standards applicable in the geographical area where the equipment is used,
- 3) improper maintenance of batteries and other sources of energy, and of the overall electric installation,
- 4) accidents or consequences of theft of the vehicle in which the telephone is transported, acts of vandalism, lightning, fire, humidity, infiltration of liquids, inclement weather,

⁽¹⁾ The warranty period may vary if overriding statutory provisions are applicable in your country.

⁽²⁾ The life of a rechargeable Alcatel telephone battery in terms of conversation time, standby time, and total service life, will depend on the conditions of use and network configuration. Batteries being considered expendable supplies, the specifications state that you should obtain optimal performance for your Alcatel phone during the first six months after purchase and for approximately 200 more recharges.

- 5) connecting or integrating the phone into equipment not supplied or not recommended by T&A Mobile Phones Limited or its affiliates, without their express written consent for such,,
- 6) any servicing, modification or repair performed by individuals not authorised by T&A Mobile Phones Limited or its affiliates, the vendor or the approved maintenance centre,
- 7) use of the equipment for a purpose other than that for which it was designed,
- 8) normal wear,
- 9) malfunctions caused by external causes (e.g., radio interference from other equipment, power or telephone line voltage fluctuations),
- 10) modifications made to the equipment even if required by changes in regulations and/or modification of network parameters,
- 11) faulty connections resulting from unsatisfactory radio transmission or caused by the absence of radio relay coverage.

In accordance with the applicable law, T&A Mobile Phones Limited or its affiliates guarantee your product against hidden defects (defects inherent in the design, manufacture, etc.).

The above provisions constitute the only claims enforceable against the manufacturer and vendor in the event of defects in the phone or accessory.

There are no express warranties, whether written or oral, other than this printed limited warranty. All implied warranties, including without limitation the implied warranties of merchantability or fitness for a particular purpose, are limited to the duration of this limited warranty. In no event shall T&A Mobile Phones Limited or its affiliates be liable for incidental or consequential damages of any nature whatsoever, including but not limited to loss of profits, commercial loss, to the full extent those damages can be disclaimed by law. Some countries/states do not allow the exclusion or limitation of incidental or consequential damages, or limitation of the duration of implied warranties, so the preceding limitations or exclusions may not apply to you.

15 Accessories ⁽¹⁾

Battery

6 Troubleshooting.....

Before contacting the aftersales department, you are advised to follow the instructions below:

- You are advised to switch off the telephone from time to time to optimise its performance.
- You are advised to fully charge the battery () for optimal operation.
- Avoid storing large amounts of data in your telephone as this may affect the performance of your telephone.

and carry out the following checks:

My mobile phone does not switch on

- Press  until the screen comes on
- Check the battery charge level
- Check the battery contacts, remove and reinstall your battery, then turn your telephone back on

My phone does not respond since several minutes

- Press the  key
- Remove the battery and re-insert it, then switch the phone back on

My screen is difficult to read

- Clean your screen
- Use your mobile phone in accordance with the recommended conditions of use

My mobile phone turns off by itself

- Check that your keypad is locked when you are not using your mobile phone
- Check the battery charge level
- Check that the function "**Auto OFF**" is not activated (see page 40).

My mobile phone does not charge properly

- Make sure that your battery is not completely discharged; the battery charge indicator can take several minutes and may be accompanied by a quiet hissing sound.
- Make sure charging is carried out under normal conditions (0°C +40°C)
- Make sure your battery is inserted. It must be inserted before plugging in the charger
- Make sure you are using an Alcatel battery and charger
- When abroad, check that the electrical current is compatible

My mobile phone does not connect to a network

- Try connecting in another location
- Verify the network coverage with your operator
- Check with your operator that your SIM card is valid
- Try selecting the available network(s) manually (see page 45)
- Try connecting at a later time if the network is overloaded

SIM card error

- Make sure the SIM card was correctly inserted (see page 14)
- Verify with your operator that your SIM card is 3V compatible; the old 5V SIM cards cannot be used
- Make sure the chip on your SIM card is not damaged or scratched

Unable to make outgoing calls

- Make sure you have dialled a valid number and pressed the  key
- For international calls, make sure you have entered the country and area codes
- Make sure your mobile phone is connected to a network, and that the network is not overloaded or unavailable
- Check your subscription with your operator (credit, SIM card valid, etc.)
- Make sure you have not barred outgoing calls (see page 47)

Unable to receive incoming calls

- Make sure your mobile phone is switched on and connected to a network (check for overloaded or unavailable network)
- Check your subscription with your operator (credit, SIM card valid, etc.)
- Make sure you have not forwarded incoming calls (see page 46)
- Make sure that you have not barred certain calls

The caller's name does not appear when a call is received

- Check that you have subscribed to this service with your operator
- Your caller has concealed his/her number

The sound quality of the calls is not optimal

- You can adjust the volume during a call by means of the  key
- Check the radio reception icon 

I am unable to use the features described in the manual

- Check with your operator to make sure that your subscription includes this service
- Check to be sure this feature does not require an Alcatel accessory.

When I select a number from my directory, the number is not dialled

- Make sure that you have correctly recorded the number in your file
- Make sure that you have selected the country prefix when calling a foreign country

I am unable to create a file in my directory

- Make sure that your directory is not full; delete some files or save the files in the product directory

My callers are unable to leave messages on my voicemail

- Contact your network operator to check service availability

I can't access my voicemail

- Make sure your operator's voicemail number is correctly entered in “**Call Services/Voicemail**”
- Try later if the network is busy

I am unable to send and receive messages

- Check your phone memory as it might be full, if necessary, delete some messages (see page 34)
- Contact your network operator to check service availability, see the messages settings (see page 35)
- Verify the server centre number with your operator
- The server centre may be saturated; try again later

The << - >> icon is displayed

- You are outside the network coverage area

I have already entered 3 incorrect PIN codes

- Contact your network operator to obtain the PUK code (Personal Unblocking Key)
