and carry out the following checks:

My mobile phone does not switch on

- Press V until the screen comes on
- Check the battery contacts, remove and reinstall your battery then turn your telephone back on

My phone has not responded for several minutes

- Press the 🖳 key
- Remove the battery and re-insert it, then switch the phone back or

conditions of use

My mobile phone turns off by itself

- · Check that your keypad is locked when you are not using your For international calls, make sure you have entered the country and mobile phone
- · Check the battery charge level
- Check that the function "Auto OFF" is not activated

- Make sure the SIM card was correctly inserted
- · Verify with your operator that your SIM card is 3V compatible; the old 5V SIM cards cannot be used
- Make sure the chip on your SIM card is not damaged or scratched

Unable to make outgoing calls

- area codes
- Make sure your mobile phone is connected to a network, and that
- Check your subscription with your operator (credit, SIM card valid)
- Make sure you have not barred outgoing calls

*C. The chargers designed for your mobile phone meet with the standard for safety In fact, since mobile phones are designed to operate at many different power levels, "1999/5/EC (R&TTE)" directive and that the accessories concerned of information technology equipment and office equipment use. They should be used they only use the minimum level of power required to provide a connection to the comply with current EC directives. The entire copy of the Declaration

NOTICE: Your mobile is not designed for chargers connected through USB cable to a computer Please use dedicated charger to charge your mobile

authorization be obtained, if necessary, in order to record private or confidential be put on the market. The protection of the health and safety for the user and any conversations or take a photograph of another person; the manufacturer, the seller other person is an essential requirement of these standards or this directive.

or vendor of your mobile phone (including the operator) disclaim any liability which THIS MOBILE PHONE COMPLIES WITH INTERNATIONAL AND EUROPEAN REOLIIREMENTS REGARDING EXPOSLIRETO RADIO WAVES Your mobile phone is a radio transmitter/receiver It was designed and manufactured

to comply with the radiofrequency (RF) exposure thresholds recommended by international requirements (ICNIRP) (1) and by the Council of the European Union (Recommendation 1999/519/EC) (2)

These limits are part of a set of requirements and establish authorised radiofrequency levels for the public. These limits were established by independent groups of experts on the basis of regular and detailed scientific assessments. They include a significant safety margin intended to ensure the safety of all, regardless of General information age or state of health

The exposure standard for mobile phones is determined by a measurement unit known as the Specific Absorption Rate or "SAR". The SAR limit is set by international requirements or by the Council of the European Union at 2 watts/kilogram (W/kg) • Hot Line Number: see the "TCT Mobile Services" leaflet or that these products must be taken to collection points at the end of carried out on the basis of standard usage modes with the phones transmitting at their maximum power level over the entire range of frequency bands.

> The ICNIRP requirements are applicable in the following regions: Central America (except Mexico), South America, North and South Africa Pacific Asia (except Taiwan and Korea) Australia

> The European recommendation (1999/519/EC) is applicable in the following regions: Europe, Israel.

My mobile phone does not charge properly

- battery charge indicator can take several minutes and may be accompanied by a quiet hissing sound.
- Make sure charging is carried out under normal conditions (0°C) +40°C)
- Make sure your battery is inserted. It must be inserted before Make sure that you have not barred certain calls nlugging in the charger
- Make sure you are using an Alcatel battery and charger
- When abroad check that the electrical current is compatible
- NOTICE: Your mobile is not designed for chargers connected through USB cable to a computer. Please use dedicated charger to The sound quality of the calls is not optimal charge your mobile.

My mobile phone does not connect to a network

- Try connecting in another location
- Verify the network coverage with your operator
- Check with your operator that your SIM card is valid
- Try selecting the available network(s) manually
- Try connecting at a later time if the network is overloaded

SIM card error

- Make sure you have dialled a valid number and pressed the key
- the network is not overloaded or unavailable

Although the SAR was established at the highest certified level, the actual SAR leve level required by the mobile phone

The highest tested SAR value for this mobile phone for use at the ear and compliance against the standard is LTW/kg While there may be differences between the SAR levels on various phones and at various positions, they all meet the relevant International guidelines and EU requirements for RE (radio-waves) exposure.

The World Health Organisation (WHO) considers that present scientific information does not indicate the need for any special precautions for use of mobile phones If individuals are concerned they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using "hands-free" devices to by the police or your operator if your telephone is stolen. This number keep mobile phones away from the head and body (fact sheet no 193). Additional information about electromagnetic fields and public health are available on the following site: http://www.who.int/neh-emf

Your telephone is equipped with a built-in antenna. For optimal operation, you shoul avoid touching it or damaging it.

- Website: www.alcatel-mobilephones.com

On our Internet site, you will find our FAQ (Frequently Asked Questions) section You can also contact us by e-mail to ask any questions you may have.

Your telephone is a transceiver that operates on GSM networks with 900 and 1800 MHz bands

network. In theory, the closer you are to a base station antenna, the lower the power of Conformity for your telephone can be obtained through our website: www.alcatel-mobilephones.com.

Protection against theft (1)

Your telephone is identified by an IMEI (phone serial number) shown on the packaging label and in the product's memory. We recommend that you note the number the first time you use your telephone by entering *, #, 0, 6, # and keep it in a safe place. It may be requested allows your mobile telephone to be blocked preventing a third person from using it, even with a different SIM card.
