Initial installation and setup

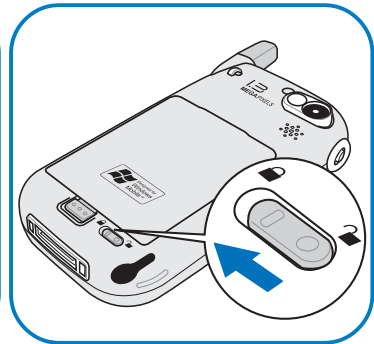

Installing the SIM card and battery

1 Locate the SIM card slot, then insert the SIM card with its nicked corner on top and its contacts face down.

2 Install the battery by sliding it to the compartment (A), then press (B) to keep it in place.

3 Use the stylus to move the battery lock to the left to secure the battery.

Charging the device battery

Using the AC adapter

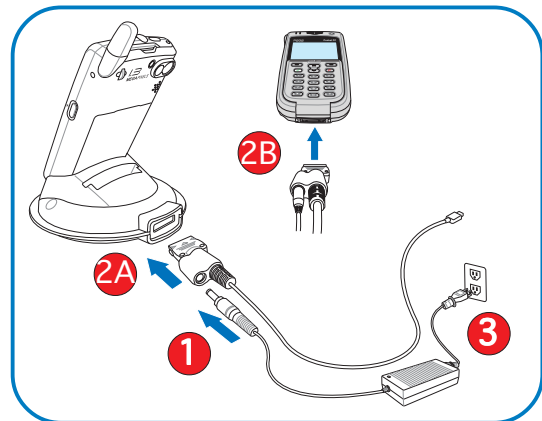

1 Connect the AC adapter plug to the DC/USB cable plug.

2 (A) **With the cradle:** Connect the DC/USB cable plug to the system connector at the back of the cradle. The cradle base lights up blue when the device battery is charging.

You can charge a spare battery to the battery charger slot on the cradle. The cradle base lights up orange until the spare battery is fully charged.

(B) **Without the cradle:** Connect the DC/USB cable plug to the system connector at the bottom of the device.

3 Connect the AC power plug to a grounded wall socket.

- The Power button LED lights up amber when the battery is charging and turns green when the battery is fully-charged. Initial charging takes four hours. It is strongly recommended that you fully charge the device before use.

Using the USB plug

1 Connect the DC/USB cable plug to the system connector at the bottom of the device.

2 Connect the USB plug of the DC/USB cable to an available USB port on your computer or notebook.

NOTE

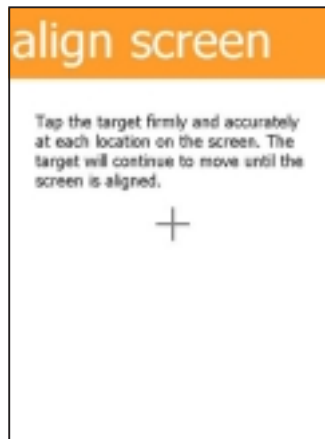

If you charge the device battery using a notebook USB port, make sure that the notebook is connected to an AC power source.

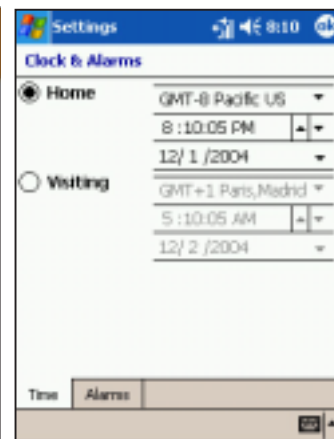

Getting started

Activating and calibrating the device

Press the power button to turn on the device, then open the flip. The first time you start or reset the device, the screen prompts you to re-calibrate and set the local time zone. Follow onscreen instructions to proceed.

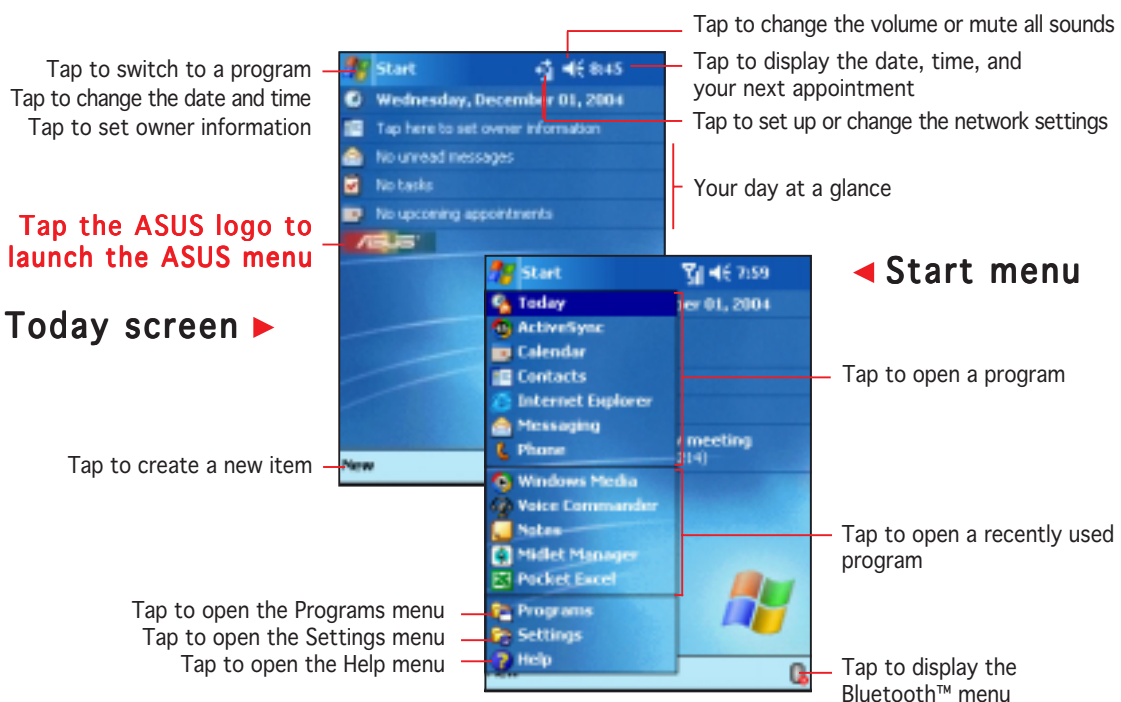

Aligning the screen

Setting the local time zone

Today screen

The **Today** screen lets you see at a glance the summary of the important information for the day. The screen appears when you turn on your device and open the phone flip for the first time each day. Tap any of the listed items with the stylus to display the details.

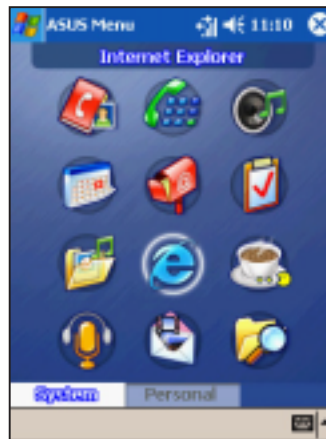

Start menu

The Start menu allows you to select programs, settings, and Help topics. Tap  from the top left corner of the screen to display the Start menu.

ASUS menu

The ASUS menu provides quick access to commonly used PDA and mobile phone applications. When the flip is open, you can launch the ASUS menu by tapping the **ASUS** logo in the Today screen. The ASUS menu in phone mode is designed for easy one-hand use.

▲ Phone mode

◀ PDA mode

NOTE

- Refer to the user guide for details on how to enable, select and change icons, and launch applications in the ASUS menu.
- When the ASUS menu is in phone mode, the LCD touch screen is disabled. You can use the LCD touch screen by opening the flip to access the selected menu or application in PDA mode.

Entering information

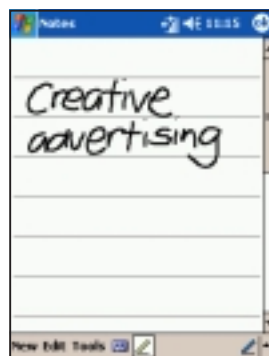

Use any one of the following ways to enter information on your device.

- **Typing** Tap the arrow on the lower right corner of the screen, select Keyboard.
- **Writing** Tap the Pen button on the command bar, use the stylus to write.
- **Drawing** Tap the Pen button on the command bar, use the stylus to draw.
- **Recording** Press the Record button on the side of the device, or tap the Record button on the recording toolbar.

Synchronizing your P505

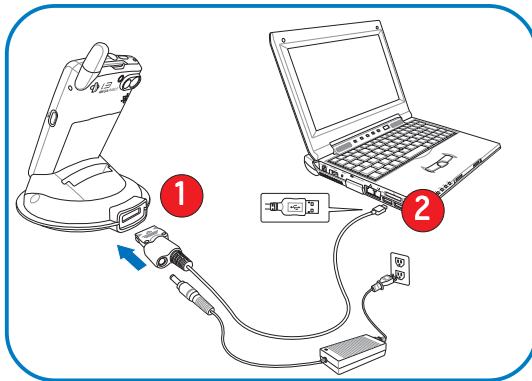

Use the P505 Companion CD to install the Microsoft® ActiveSync® on your desktop computer. ActiveSync® is already installed on your device.

NOTE Do not connect your device to your computer until you have installed ActiveSync®.

Using the cradle

1 Place the device on the cradle, then connect the DC/USB cable plug to the system connector at the back of the cradle.

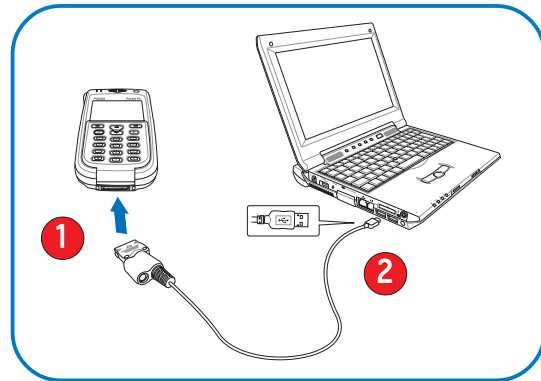

2 Connect the USB plug of the DC/USB cable to a USB port on your computer.

Without the cradle

1 Connect the DC/USB cable plug to the system connector at the bottom of the device.

2 Connect the USB plug of the DC/USB cable to an available USB port on your computer.

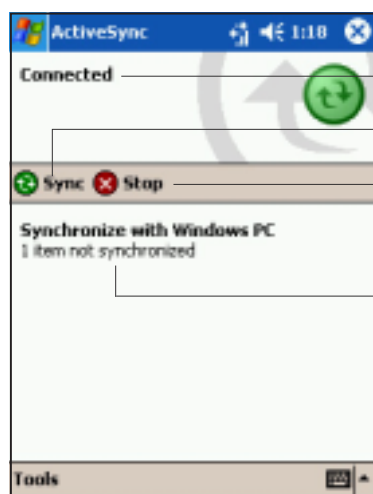

NOTE During synchronization, the battery is charged through the AC adapter (if you connected the AC adapter plug to the DC/USB cable plug) or through the USB port.

Synchronization status

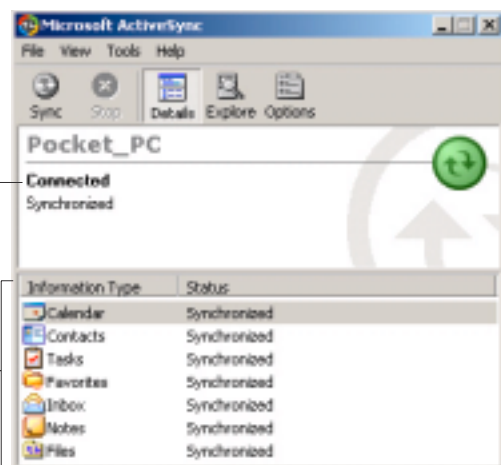

Upon connection, your device is automatically synchronized with your computer.

▼ Synchronization status on P505

Tap to synchronize via IR or change synchronization settings

▼ Synchronization status on your computer

Copying SIM contacts to P505 Contacts

With **SIM Manager**, you can copy contact information from your SIM to the device Contacts and vice-versa. To copy a contact from the SIM to the device Contacts:

1 Tap , **Programs**, then tap the **SIM Manager** icon.

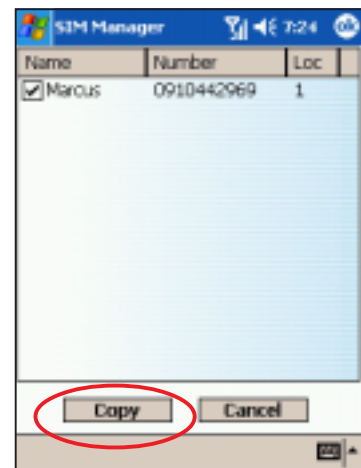

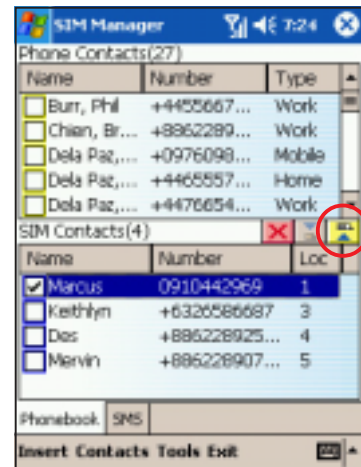

2 Tap the box before the SIM contact(s) you want to copy. To copy all SIM contacts, tap and hold the SIM Contacts section, then tap **Select All SIM Contacts** from the menu.

3 Tap . If you selected all SIM Contacts, tap and hold anywhere in SIM Contacts section, then tap **Copy All SIM Contacts** from the menu.

4 The screen displays the selected contact(s) to copy. Tap **Copy**.

5 A **Copy Done** window appears to indicate that you have successfully copied the SIM contact(s) to the device Contacts.

Tap  to close the window.
