Safety Information

This section contains important information on safe and efficient operation. Please read this information before using the device.

- Use only the batteries and power adapter provided by the manufacturer. Use of unauthorized accessories may void your warranty.
- Do not remove the battery while the phone is charging.
- Avoid using the phone near electromagnetic sources such as TVs, radios, and microwave ovens.
- Unplug the power adapter from the wall outlet during lightning storms to avoid electric shock or fire.
- Do not expose the phone or the battery to direct sunlight.
- Do not store your phone in temperatures higher than 60°C or 140°F.
- Do not use harsh chemicals or detergents to clean your phone.
- Do not handle the phone with wet hands while it is being charged. This may cause an electric shock or serious damage to the phone.

SAFETY PRECAUTIONS FOR BATTERY USE

- Use only approved battery.
- Keep the battery dry and away from any liquid since this may cause a short circuit.
- Keep the battery away from metal objects since this may cause a short circuit.
- Do not use damaged or deformed batteries.
- If the battery emits a foul odor, discontinue use.
- Keep the battery away from babies and small children.
- If the battery leaks:
 - Do not allow the leaking fluid to come in contact with your skin, eyes or clothing. If already in contact, rinse with clean water immediately and seek medical advice.
 - Keep the battery away from fire since this may cause the battery to explode.
 - Do not attempt to open or service the battery yourself.
 - Do not dispose battery in fire or water.
 - Recycle or dispose used batteries according to the local regulations.
- Prevent to place the battery in extreme temperature condition, it maybe influence the battery efficiency.

ROAD AND ENVIRONMENTAL SAFETY

- Turn off the phone in areas with a potentially explosive atmosphere or where flammable objects exist such as gas stations, fuel depots, and chemical plants among others. Sparks from these areas could cause explosion or fire and result in injury or even death.
- Do not use hand-held phones while driving a vehicle. Use hands-free devices as an alternative.

SAFETY IN AIRCRAFT

Do not use the phone on board an aircraft. The phone's network signals may cause interference to the navigation system. As a safety measurement, it is against the law in most countries to use the phone on board an aircraft.

Android is a trademark of Google Inc. Use of this trademark is subject to Google Permissions. Bluetooth and the Bluetooth logo are trademarks owned by Bluetooth SIG, Inc. Java, JME and all other Java-based marks are trademarks or registered trademarks of Sun Microsystems, Inc. in the United States and other countries.

CE SAR Compliance

This device meets the EU requirements (1999/519/EC) on the limitation of exposure of the general public to electromagnetic fields by way of health protection.

The limits are part of extensive recommendations for the protection of the general public. These recommendations have been developed and checked by independent scientific organizations through regular and thorough evaluations of scientific studies. The unit of measurement for the European Council's recommended limit for mobile devices is the "Specific Absorption Rate" (SAR), and the SAR limit is 2.0 W/kg averaged over 10 gram of body tissue. It meets the requirements of the International Commission on Non-Ionizing Radiation Protection (ICNIRP).

For body worn operation, this device has been tested and meets the ICNIRP exposure guidelines and the European Standard EN 62311 and EN 62209-2, for use with dedicated accessories. Use of other accessories which contain metals may not ensure compliance with ICNIRP exposure guidelines.

SAR is measured with the device at a separation of 1.5 cm to the body, while transmitting at the highest certified output power level in all frequency bands of the mobile device.

The maximum SAR value for each frequency band is listed below:

Band	Position	SAR10g (W/kg)
GSM900	Head	1.02
GSM1800	Head	0.35
WCDMA Band VIII	Head	0.658
WCDMA Band I	Head	0.346
WLAN2.4G	Head	0.136
GSM900	Body(1.5cm Gap)	0.609
GSM1800	Body(1.5cm Gap)	0.312
WCDMA Band VIII	Body(1.5cm Gap)	0.433

WCDMA Band I	Body(1.5cm Gap)	0.311
WLAN2.4G	Body(1.5cm Gap)	0.029

WEEE Notice

The WEEE logo on the product or on its box indicates that this product must not be disposed of or dumped with your other household waste. You are liable to dispose of all your electronic or electrical waste equipment by relocating over to the specified collection point for recycling of such hazardous waste. Isolated collection and proper recovery of your electronic and electrical waste equipment at the time of disposal will allow us to help conserve natural resources. Moreover, proper recycling of the electronic and electrical waste equipment will ensure safety of human health and environment. For more information about electronic and electrical waste equipment disposal, recovery, and collection points, please contact your local city center, household waste disposal service, shop from where you purchased the equipment, or manufacturer of the equipment.

RoHS Compliance

This product is in compliance with Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003, on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) and its amendments.

European Union Regulatory Conformance

The equipment complies with the RF Exposure Requirement 1999/519/EC, Council Recommendation of 12 July 1999 on the limitation of exposure of the general public to electromagnetic fields (0–300 GHz). This equipment meets the following conformance standards: EN 300 328 V1.7.1, EN 301489-1 V1.9.2, EN 301489-3 V1.4.1, EN 301489-7 V1.3.1, EN 301489-17 V2.1.1, EN 301489-24 V1.5.1, EN 301 511 V9.0.2, EN 301 908-1 V5.2.1/-2 V5.2.1, EN50360:2001/AC:2006, EN62209-1:2006/-2:2010, EN62311:2008, EN 62479:2010, EN 300 440-1V1.6.1/-2 V1.4.1, EN 55022:2010/AC:2011 Class B, EN55024:2010, EN 55013:2001/A1:2003/A2:2006, EN 61000-3-2:2006/A2:2009, EN 61000-3-3:2008, EN 50332-1:2000/-2:2003 and EN 60950-1:2006/A11:2009. Changes or modifications to this product not authorized by the manufacturer could void the EMC compliance and negate your authority to operate the product. This product has demonstrated EMC compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, televisions, and other electronic devices. We, hereby, declare that this cellular, Wi-Fi, & Bluetooth radio is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Intellectual Property Right Information

Products with 2.4–GHz Wireless LAN Devices France

L'utilisation de cet équipement (2.4GHz wireless LAN) est soumise à certaines restrictions: cet équipement peut être utilisé à l'intérieur d'un bâtiment en utilisant toutes les fréquences de 2400 à 2483.5MHz (Chaîne 1–13). Pour une utilisation en environnement extérieur, les fréquences comprises entre 2400-2454 MHz peuvent être utilisées. Pour les dernières restrictions, voir <http://www.art-telecom.fr>.

For 2.4–GHz wireless LAN operation of this product, certain restrictions apply. This equipment may use the entire–2400–MHz to 2483.5–MHz frequency band (channels 1 through 13) for indoor applications. For outdoor use, only 2400-2454 MHz frequency band may be used. For the latest requirements, see <http://www.art-telecom.fr>.

Sound Pressure Level requirement

This device has been tested to comply with the Sound Pressure Level requirement laid down in the applicable EN 50332-1 and/or EN 50332-2 standards. Permanent hearing loss may occur if earphones or headphones are used at high volume for prolonged periods of time.

Prevention of Hearing Loss

Warning statement requirement under EN 60950-1:A12.

To prevent possible hearing damage, do not listen at high volume levels for long periods.

Note:

For France, headphones/earphones for this device are compliant with the sound pressure level requirement laid down in the applicable EN 50332-1: 2000 and/or EN50332-2: 2003 standard as required by French Article L.5232-1.

A pleine puissance, l'écoute prolongée
du baladeur peut endommager
l'audition de l'utilisateur.

General Information

This section contains important information on safe and efficient operation. Please read this information before using the device. Ignorance of the following notices may lead to violations of the law.

- Before using the device, please make sure you have fully charged the battery.
- Do NOT remove the battery from the device during charging.
- Before inserting SIM card into the device, make sure that the device is switched off.
- Do NOT attempt to disassemble the device on your own. This should be done by an authorized person.
- Use the device in accordance to instructions when in public facilities.
- In some countries, it is a violation against the law to record phone conversations. Always ask permission of the other party when you are going to record a conversation.
- To protect your ears, turn down the volume before you use stereo headsets or other audio devices.
- To avoid damaging the touch screen and the device, do NOT apply excessive pressure on them, and remove the device from your pants' pocket before you sit down. It is also recommended that you only use the stylus or your finger to interact with the touch screen. It is not covered by the warranty that you crack the touch screen because of the improper usage.
- When you use the device for a long time, such as talking on the phone, browsing online, or charging the battery, the device may become warm. In most cases, this condition is normal.
- Refer servicing to the provider, or an authorized technician under the following conditions: 1. The device has been damaged. 2. When you follow the instructions to use your device, it does not operate normally. 3. The device has been exposed to water. 4. Liquid has been spilled or an object has fallen onto the device.
- Do Not push unauthorized objects into slots and openings in your device.
- The device should be placed away from heat sources such as stoves, radiators, heat registers, or other products that produce heat.
- Condensation may form on or within your device, when you move your device between environments with very different temperature and/or humidity ranges. To avoid damaging your device, make the moisture to evaporate before you use the device.
- To avoid damaging your device, do Not put your device on an unstable table, stand, bracket, or other places.
- Before you clean your device, unplug it, please. Use a damp cloth for cleaning, but do Not use water, liquid cleaners, or aerosol cleaners to clean the touch screen.

1 Getting Started

1. Getting Started

1.1 Your Phone

This section introduces you to the hardware of the device.

No.	Items	Functions
1	Earphone jack	Use a headset for hands-free conversation or listening to music.
2	Front Camera	Use this front Camera to take pictures or record video.

3	P sensor/ Light sensor	<ul style="list-style-type: none"> • P Sensor: The screen will turn off automatically when the device is close to the face during a phone call. • Light Sensor: Adjust the brightness of the screen according to the environment.
4	Receiver	The source of voice.
5	LED	<ul style="list-style-type: none"> • Power status notification. • Other notification. (New message/ New email/ Missed call).
6	Touch screen	Display screen.
7	SmartKey	User-defined key. May define these three keys to be any function or hot key.
8	MIC	Sound Receiver.
9	Volume	Press upward or downward to turn louder or down volume. Press down key fully to enter vibration mode.
10	Power	<ul style="list-style-type: none"> • Press and hold for several seconds to turn the phone on or off. • To set your phone to the sleep mode, press the power button briefly. Press again to turn the display back on.

1 Getting Started

11	Micro-USB port	<ul style="list-style-type: none">• Connect USB cable and the AC adapter to charge the battery mildly.• USB tethering: Share your phone's mobile data connection via USB cable.
12	Flash LED	Help photo shooting.
13	5.0MP Camera	The camera on the back of the device supports 5 megapixels photo and high-quality video.
14	Back cover	You need to open the cover to install or uninstall the battery, SIM card and microSD card.
15	Speaker	The source of music and voice.

1.2 Installing or uninstalling the SIM Card, Battery, and Memory Card

To remove the back cover

1. Please turn over your phone with the back cover facing up.

1 Getting Started

2. Please move your fingertip into the slot.

3. Pull the back cover with your fingertip and remove it.

To install the SIM1 card

To install the SIM2 card

SIM card

The SIM card contains your phone number, memory storage, and details of network service.

To install the SIM card

There are two slots for SIM cards. Left slot is for SIM1; right slot is for SIM2, the gold contacts are facing down. And the cut-off corner is facing toward the outside.

To remove the SIM card

1. First, remove the battery.
2. Use your finger to slide the SIM card out of card slot.

Battery

Your phone comes with a rechargeable battery. Battery life varies depending on the network, used applications, and the type of connections attached to your phone.

1 Getting Started

To install the battery

Make sure the contact of the battery is close to connectors in the battery slot.

To remove the battery

Use your fingertip to lift the battery, then remove it.

NOTE:

- To ensure battery performance and avoid risk from fire.
- Use only the original battery designated for the phone.
- Do not store the battery in temperature lower than -10°C or higher than 45°C .

To replace the back cover

1. Please insert the cover into the slot from the top.

2. Then, press the bottom point of back cover fully until hearing clicks.

3. Finally, press two point on the left and right of back cover fully until hearing clicks.

1 Getting Started

Memory card

You may need a microSD card to store photos, music, videos and other data.

To install the memory card

1. Insert the memory card with the gold contact facing down.
2. Push the memory card until it clicks into slot.

To remove the memory card

1. For safe removal, tap Application Drawer > APPS tab > Settings > Storage > Unmount SD card.
2. Push the memory card to eject it from the slot.

1.3 Charging the Battery

When you take your phone out of box for the first time, the battery isn't at full of power. Please charge the battery fully before using.

1. Connect the USB cable to the AC adapter, and then, connect to the device via the USB cable.
2. Plug the AC adapter to a socket to start the charge.

NOTE:

To ensure safety, do not remove the battery from the phone while the AC adapter is connected or while it is being charged.

1.4 Turning the Phone On or Off

After installing the SIM card and charging the battery, you are now ready to turn your phone on.

To turn on your phone

Press and hold the power button until the phone shortly vibrates.

To turn off your phone

1. Press and hold the power button for several seconds.
2. A pop-up window appears, then tap "Power off".
3. Select "OK" to confirm.

To set your phone to the sleep mode

To set your phone to the sleep mode, press the power button briefly. It will turn the display off. To turn the display on, press the power button briefly again.

1 Getting Started

1.5 Lock/Unlock

There are four functions you may use when turning the device on or coming back from sleep mode.

Unlock the device

Drag G icon on screen and slide to Unlock icon for unlocking the device.

1 Getting Started

Taking pictures

Drag G icon to Camera icon to taking some pictures.

Muting the speaker

Drag G icon to Mute icon to mute the speaker..

1 Getting Started

Making a phone call

Drag G icon to Mute icon to mute the speaker.

1.6 Notification LED

Types	Descriptions
Solid red light	Battery is charging.
Solid green light	Battery is full.
Flashing red light	Battery is low.
Flashing green light	Notification (New message/ Missed call/ New email)

1.7 Initial Settings

Before initializing your device, please remember to insert your SIM card first. When turning on your phone for the first time or resetting your phone, you need to follow the steps as below:

1. On the "Welcome" screen, you could change the default language, or tap "Start" to continue the setting. In this step, you can tap "Emergency Call" to make an emergency call.
2. In the screen of "Make it Google", you can tap "Get an account" to create a new account, tap "Sign in" to sign in the Google account, or tap "Not now" to do it later. Please follow the on-screen instruction to log in.
3. In the screen of "Use Google location", you can allow or disallow Google's location service to collect anonymous location data. You can also allow or disallow Google to use My Location for Google search results and other Google services. Then, tap "Next".
4. Set up your name to personalize some apps. Then, tap "Next".
5. In the screen of "Google services", you could get some information about Google Term of Service from here.
6. Finally, tap "Finish" to complete the whole initial settings.

NOTE:

Some applications and functions needed to connect to the Internet such as location-based services and the automatic synchronization of your online accounts may incur the fees of the connection from your service provider. You may enable or disable the Internet later.

1.8 Using Headset

For hands-free conversation or listening to music, plug a headset into the headset jack.

NOTE:

- When using a headset, your ability to hear outside sounds may be limited. Do not use the headset if it will endanger you.
- Do not set the volume to its maximum with a headset as it may damage your hearing.

The following instructions are only provided with the original headset of the original manufacturer:

Types	Descriptions
Press the button on the headset	<ul style="list-style-type: none"> • When you receive an incoming call, press the button to answer the call. If you are having a call conversation, press the button to mute, and press again to un-mute. • In music mode, press the button to play, and press again to pause music. • When you are listening to music, press twice quickly, forward to next music.
Press and hold the button on the headset	<ul style="list-style-type: none"> • If you are having a call, press and hold the button to end the call. • If there is an incoming call, press and hold the button to end the call. • Press and hold the button to launch music player. • When you are listening to music, press and hold the button back to Playlist.

1.9 Adjusting the Volume

To adjust the volume of ringtone, media, and alarm

1. Tap Application Drawer > APPS tab > Settings > Sound > Volumes.
2. Slide the volume bar to adjust each volume. Do as the following:
 - a. Drag the slider towards the left to decrease the volume, or drag the slider towards the right to increase the volume. Tap "OK" to save your settings.
 - b. Tap Application Drawer > APPS tab > Settings > Sound > Silent mode to set the phone to the silent mode.

NOTE:

When the phone is set to the silent mode, all sounds are turned off except media and alarm.

1.10 People

"People" is your phonebook that lets you store friends' names, phone numbers, e-mail addresses and other information. "People" can connect to your Google, Corporate accounts, and integrate your contacts information.

Adding a Contact

1. Tap Application Drawer > APPS tab > People.
2. Tap  tab > tap  to add a new contact.
3. Choose where you want to synchronize the new contact with, Phone, SIM1 or SIM2.
4. A new contact screen appears.
5. Tap each field to fill out the contact information.
6. Tap "DONE" to save it.

NOTE:

The SIM card contact can't add picture to contact information.

1 Getting Started

Searching for Contacts

On People Screen, do any of the following to easily search for contacts:

- Tap  Type the first few letters of the contact name to search. The list is filtered when typing. When finish searching, you could tap  to go back to the contacts screen.

Contact groups

If you want to categorize the contacts, please follow the steps as below:

To add Contact groups in local groups

1. Tap Application Drawer > APPS tab > People.
2. Tap  tab. You can tap  or  to switch the group of sorts.
3. On local groups screen, tap  to add a new group.
4. Enter the new group name, then tap "OK".

5. Tap one of groups.
6. Tap "Add members" to select new members. Tap "OK" to save your settings.
7. Members of the group are displayed below.

To add Contact groups in remote groups

1. Tap Application Drawer > APPS tab > People.
2. Tap  tab. You can tap  or  to switch the group of sorts.
3. On remote groups screen, tap  to add a new group.
4. Select an account to add the group (If you have two more accounts).
5. Enter the group name.
6. Type persons' name to add members. Members of the group are displayed below.
7. Tap "DONE" to finish settings.

Manage Accounts

1. Tap Application Drawer > APPS tab > People.
2. Tap Menu > Accounts.
3. You could turn on "Accounts & sync ". If so, Applications can sync, send, and receive data automatically.

Import / Export Contacts

Import Contacts from SIM card.

1. Tap Application Drawer > APPS tab > People.
2. Tap Menu > Import/export > Import from SIM card.
3. You can select SIM1 or SIM2 (If SIM2 card inserted). Then tap "OK".
4. You can select an account to save the import contacts.
5. Select contacts you want, or check "All". Then tap "Ok".
6. You can check the import situation in the status bar.

1 Getting Started

Import Contacts from storage

1. Tap Application Drawer > APPS tab > People.
2. Tap Menu > Import/export > Import from storage.
3. You can select an account to save the import contacts.
4. Select the vCard files. Please follow the steps in the submenu.
5. You can check the import situation in the status bar.

Back up Contacts

Export Contacts to SIM card

1. Tap Application Drawer > APPS > People.
2. Tap Menu > Import/export > Export to SIM card.
3. You can select SIM1 or SIM2 (if SIM2 card inserted). Then tap "OK".
4. Select contacts you want, or check "All". Then tap "Ok".

Export Contacts to storage

1. Tap Application Drawer > APPS tab > People.
2. Tap Menu > Import/export > Export to storage.
3. Tap "OK" to confirm.

Favorite Contacts

You can add the most frequently called contacts to the favorite contact list which helps you to find contacts quickly and easily.

Add to Favorites

1. Tap Application Drawer > APPS tab > People.
2. On  tab, tap the desired contact into the information screen.
3. Tap icon  to add to Favorites.
4. When you tap  tab on the Contacts screen, you will find the contact in the favorite list.

Remove from Favorites

1. Tap Application Drawer > APPS tab > People.
2. Tap  tab, the favorite contacts are displayed.
3. Tap the desired contact into the information screen.
4. Tap icon  to remove it from Favorites.

1.11 The Home Screen

On Home Screen, you can quickly access common features and view notifications of missed calls, received messages, battery, and the status of the connection.

Default Home Screen: Main functions.

1 Getting Started

You can slide the Home Screen from the left side to the right side or from the right side to the left side to switch it. The icons located at the bottom of the home page have different functions:

Icons	Descriptions
	Favorites Tray can keep your most important shortcuts and folders.
	Tap to launch Application Drawer.
	Navigation bar: Back Key Tap to go back to last page.
	Navigation bar: Home Key Tap to go back to Home screen.
	Navigation bar: Recent apps Tap to bring up Recent apps list.

Settings Home Screen: Shortcuts for settings.

Icons	Functions
	Enable/disable Wi-Fi.
	Enable/disable Bluetooth.
	Enable/disable GPS.
	Enable/disable Data Synchronization.
	Tap to adjust the brightness.
	Enable/disable mobile network.
	Enable/disable hotspot.

1 Getting Started

Multimedia Home Screen: Multimedia settings.

Self-defined Home Screen: You can add the shortcuts and widgets.

How to Navigate

- **Tap:** You can tap the icon on the screen to activate the application.
- **Press and Hold:** Press and hold the icon on the Home Screen to make it movable. Press and hold an icon in the Application Drawer to add it to the Home Screen you want.
- **Slide:** Slide the Home Screen from the left side to the right side or from the right side to the left side to change different pages.
- **Drag:** After pressing and holding the icon on the Home Screen, you can arrange it. Drag it to anywhere you like on the screen or to remove.

1 Getting Started

Status Icons

The icons of the status bar indicate different types of information. Tap the status bar and scroll down to view notifications or view system information.

2. Tap "Default notification".
3. Select a ringtone from the list.
4. Tap "OK" to finish.

To create a ringtone for incoming call

1. Tap Application Drawer > APPS tab > Settings > Sound
2. Tap "Phone ringtone". On "SIM1" or "SIM2" tab (If SIM2 inserted), tap "Phone ringtone".
3. Select a ringtone from the list.
4. Choose "Cut" to go to Virtual Cutting Ringtone function page.

5. Drag the blue flag  to where you want the ringtone starts.
6. Drag the red flag  to where you want the ringtone ends.
7. Tap  to start it over or tap  to save the ringtone.
8. You could listen to the ringtone cut by yourself from tapping 

7 Managing Your Phone

7.3 Protecting Your Phone

You can protect your phone from unauthorized users by requiring the PIN or entering a password.

Enable the PIN of the SIM/RUIM card

When the PIN is enabled, you are required to enter the PIN before making a call.

1. Tap Application Drawer > APPS tab > Settings > Security > Set up SIM/RUIM card lock.
2. Tap "SIM1" or "SIM2" tab. (If SIM2 inserted).
3. Check "Lock SIM card". Input the PIN, and then, tap "OK".

Change the PIN of the SIM/RUIM card

1. Tap Application Drawer > APPS tab > Settings > Security > Set up SIM card lock.
2. Tap "SIM1" or "SIM2" tab. (If SIM2 inserted).
3. Tap "Change SIM PIN". Type the old PIN. Then tap "OK".
4. Type the new PIN. Then tap "OK".

5. Re-type the new PIN. Then tap "OK" to change the PIN.

Set up Password Protection

1. Tap Application Drawer > APPS tab > Settings > Security > Screen lock > Password.
2. Enter your password, and then, tap "Continue". Confirm your password, then, tap "OK".
3. If you want to disable screen lock security, please tap Application Drawer > Settings > APPS tab > Security > Screen lock. Confirm your password, and then, tap "Continue". Tap "None" to disable it.

Set up unlock pattern

You can further secure your data by locking the screen and requiring a screen unlock pattern every time after your phone is turned on or it wakes up from the sleep mode every time (screen is off).

1. Tap Application Drawer > APPS tab > Settings > Security > Screen lock > Pattern.
2. Draw the unlock pattern by connecting at least four dots. Then tap "Continue".
3. Draw the unlock pattern again, and then, tap "Confirm".
4. If you want to disable the function, please tap Application Drawer > APPS tab > Settings > Security > Screen lock. Confirm the saved pattern, and then, tap "None" to disable it.

7 Managing Your Phone

7.4 Resetting Your Phone

With Clean Boot, you can reset your phone to its factory defaults. When you reset your phone, the data stored in your phone may be erased.

1. Tap Application Drawer > APPS tab > Settings > Backup & reset.
2. Tap Factory data reset > Reset phone > Erase everything to reset the phone.

NOTE:

Before reset your device, please remember to back up all your data and information.

7.5 Specifications
