**DIGITAL CAMERA**

FE-360/X-875/C-570
FE-20/X-15/C-25

Instruction Manual

- Thank you for purchasing an Olympus digital camera. Before you start to use your new camera, please read these instructions carefully to enjoy optimum performance and a longer service life. Keep this manual in a safe place for future reference.

- We recommend that you take test shots to get accustomed to your camera before taking important photographs.

- In the interest of continually improving products, Olympus reserves the right to update or modify information contained in this manual.

- The screen and camera illustrations shown in this manual were produced during the development stages and may differ from the actual product. Unless otherwise specified, the explanation about these illustrations is provided for FE-360/X-875/C-570.

Adjusting to a natural color scheme [WB]

📷 CAMERA MENU ▶ WB

🎥/📷 ⬭ : P SCENE 🎥 «🖐»

Submenu 2	Application
AUTO	The camera automatically adjusts the white balance according to the shooting scene.
☀	For shooting outdoors under a clear sky
☁	For shooting outdoors under a cloudy sky
💡	For shooting under tungsten lighting
📺1	For shooting under daylight fluorescent lighting (household lighting, etc.)
📺2	For shooting under neutral fluorescent lighting (desk lamps, etc.)
📺3	For shooting under white fluorescent lighting (offices, etc.)

Selecting the ISO sensitivity [ISO]

📷 CAMERA MENU ▶ ISO

🎥/📷 ⬭ : P

⚠ In the ISO setting, although smaller values result in less sensitivity, sharp images can be taken under fully lit conditions. Larger values result in higher sensitivity, and images can be taken at fast shutter speeds even under dimly lit conditions. High sensitivity introduces noise into the resulting picture, which may give it a grainy appearance.

Submenu 2	Application
AUTO	The camera automatically adjusts the sensitivity according to the shooting scene.
64/100/200/400/800/1000	The value of the ISO sensitivity is fixed.

Recording sound when shooting still images [🎤]

📷 CAMERA MENU ▶ 🎤

🎥/📷 ⬭ : P SCENE «🖐»

Submenu 2	Application
OFF	No sound is recorded.
ON	The camera automatically starts recording for approx. 4 seconds after taking the picture. This is useful for recording notes or comments about the picture.

⚠ When recording, aim the microphone **(p. 6)** at the source of the sound you want to record.

⚠ The sound when recorded in still REC can not be played back with this camera. To listen to the sound, connect to a TV or PC.

Selecting sound setting for movies [🎤]

📷 CAMERA MENU ▶ 🎤

🎥/📷 ⬭ : 🎥

Submenu 2	Application
OFF	No sound is recorded.
ON	Sound is recorded.

⚠ When set to [ON], only the digital zoom can be used during movie recording. To record the movie with the optical zoom, set [🎤] (movies) to [OFF].

⚠ The sound when recorded in movie REC cannot be played back with this camera. To listen to the sound, connect to a TV or PC.

Creating panoramic images [PANORAMA]

🎥/🔺 ▭ : **P SCENE** 《🖐》

Panorama shooting lets you create a panoramic picture, using the OLYMPUS Master 2 software on the provided CD-ROM.

⚠ An Olympus xD-Picture Card is required for panoramic shooting. Cards by other manufacturers do not support panoramic shooting.

⚠ Panoramic shooting is not available using a microSD card in the microSD Attachment.

⚠ The focus, exposure **(p. 19)**, zoom position **(p. 19)**, and **[WB] (p. 25)** are locked at the first frame.

⚠ The flash **(p. 19)** is fixed to ⚡ (FLASH OFF) mode.

① Use ▽🗑/△ ◁▷ to select the direction that the frames are combined.

② Press the shutter button to take the first frame, and then compose the second shot.

> ● The part of the previous picture where it will be joined to the next picture does not remain in the frame. You have to remember what the part in the frame looked like and take the next picture so it overlaps.
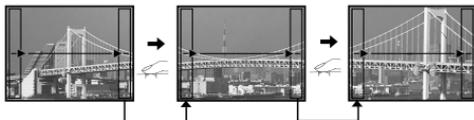

③ Repeat Step ② until the number of required frames is taken, and then press the ▦ button when done.

⚠ When the [▦] mark is displayed, you cannot continue shooting any further. Panorama shooting is possible for up to 10 frames.

⚠ Refer to the OLYMPUS Master 2 help guide for details on how to make panorama images.

Selecting the focusing on a face [FACE DETECT]

🎥/🔺 ▭ : **P SCENE** 《🖐》

Submenu 2	Application
OFF	The camera does not focus on a face.
ON[*1]	This is used for taking pictures of people. The camera automatically detects and focuses on a face.

[*1] For some subjects, the frame may not appear or may take some time to appear.

Shooting with P or AUTO [▣ P/AUTO]

🎥/🔺 ▭ : **SCENE** 《🖐》

If you select [▣ P/AUTO] when 《🖐》 mode or **SCENE** mode has been set, the mode will change to **P** or **AUTO**.

Selecting a scene mode according to the shooting situation [🌺 SCENE]

🌺 SCENE

📹/🔲 ⬜⬜⬜ : SCENE

🛈 In **SCENE** modes, the optimum shooting settings are pre-programmed for specific shooting scenes. For this reason, settings may not be changed in some modes.

Submenu 1	Application
🧑 PORTRAIT/🏔 LANDSCAPE/ 🌃 NIGHT+PORTRAIT[*1]/ 🏃 SPORT/ 🏠 INDOOR/ 🕯 CANDLE/ 👥 SELF PORTRAIT/ 🌅 SUNSET[*1]/ 🎆 FIREWORKS[*1]/ 🖼 BEHIND GLASS/🍴CUISINE/ 📄 DOCUMENTS/⚖ AUCTION/ 🐠 UNDERWATER WIDE1[*2]/ 🐠 UNDERWATER WIDE2[*2]/ 🐟 UNDERWATER MACRO[*2]	The camera takes a picture in the mode for the shooting scene.

[*1] When the subject is dark, noise reduction is automatically activated. This approximately doubles the shooting time, during which no other pictures can be taken.
[*2] Available in the FE-360/X-875/C-570 only.

To select a mode
"Using the best mode for the shooting scene (SCENE mode)" (p. 17)

Shooting with DIS MODE [(((🖐))) DIS MODE]

(((🖐))) DIS MODE

📹/🔲 ⬜⬜⬜ : AUTO P SCENE

Printing

Direct printing (PictBridge[1]*)*

By connecting the camera to a PictBridge-compatible printer, you can print images directly without using a computer.
To find out if your printer supports PictBridge, refer to the printer's instruction manual.

[1] PictBridge is a standard for connecting digital cameras and printers of different makers and printing out pictures directly.

⚠ The printing modes, paper sizes, and other parameters that can be set with the camera vary depending on the printer that is used. For details, refer to the printer's instruction manual.

⚠ For details on the available paper types, loading paper, and installing ink cassettes, refer to the printer's instruction manual.

Printing images at the printer's standard settings [EASY PRINT]

1 Display the image to be printed on the monitor.

⚠ **"Viewing images" (p. 15)**

⚠ Printing can also be started when the camera is turned off. After performing Step 2, use 🔄 to select [EASY PRINT], press the 🖼 button. Use 🔂 to select an image, and proceed to Step 3.

2 Turn on the printer, and then connect the printer and camera.
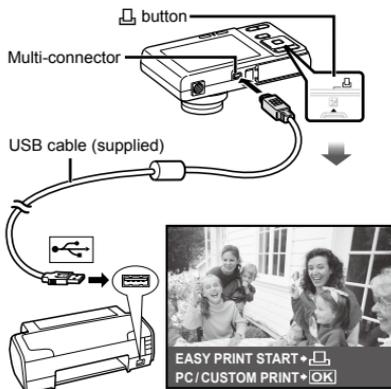

3 Press the 🖶 button to start printing.

4 To print another image, use 🔂 to select an image, and press the 🖶 button.

To exit printing
After a selected image is displayed on the screen, disconnect the USB cable from the camera and printer.

Print Reservations (DPOF[*1])

In print reservations, the number of prints and date imprint option are saved in the image on the card. This enables easy printing at a printer or print shop supporting DPOF by using only the print reservations on the card without a computer or a camera.

[*1] DPOF is a standard for storing automatic printout information from digital cameras.

ℹ️ Print reservations can be set only for the images stored on the card. Insert a card with recorded images before making print reservations.

ℹ️ DPOF reservations set by another DPOF device cannot be changed by this camera. Make changes using the original device. Making new DPOF reservations with this camera will erase the reservations made by the other device.

ℹ️ DPOF print reservations can be made for up to 999 images per card.

5 If necessary, repeat Step 4, and then press the 🖲 button when finished.

6 Use 〓/⟲ to select the [⊙] (date print) screen option, and press the 🖲 button.

● The settings are applied to the remaining images with the print reservation data.

7 Use 〓/⟲ to select [SET], and press the 🖲 button.

Using OLYMPUS Master 2

System requirements and installation of OLYMPUS Master 2

Install the OLYMPUS Master 2 software by referring to the included installation guide.

Connecting the camera to a computer

1 Make sure the camera is turned off.

● The monitor is off.
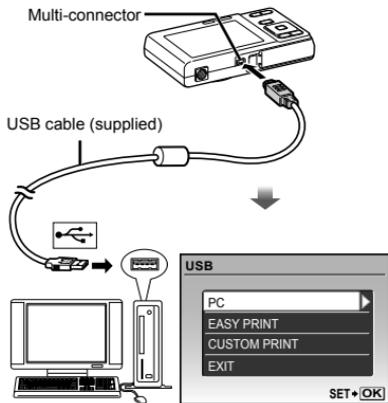

● The lens is retracted.

2 Connect the camera to a computer.

● The camera automatically turns on.

Multi-connector

USB cable (supplied)

```
USB
┌──────────────────┐
│ PC              ▶│
├──────────────────┤
│ EASY PRINT       │
│ CUSTOM PRINT     │
│ EXIT             │
└──────────────────┘
          SET◆OK
```

⚠ Locate the position of the USB port by referring to your computer's instructions manual.

3 Use ⬇🗑/⬆⟲ to select [PC], and press the 🖼 button.

● The computer automatically detects the camera as a new device on the first connection.

Windows

After the computer detects the camera, a message indicating the completion of the setting appears. Confirm the message and click "OK". The camera is recognized as a removable disk.

Macintosh

When iPhoto has started, exit iPhoto and start OLYMPUS Master 2.

⚠ While the camera is connected to the computer, shooting functions are disabled.

⚠ Connecting the camera to a computer via a USB hub may cause unstable operation.

⚠ When [MTP] is set for the submenu that appears by pressing ▷ after selecting [PC] in Step 3, images cannot be transferred to a computer using OLYMPUS Master 2.

Starting OLYMPUS Master 2

1 Double-click the OLYMPUS Master 2 icon.

Windows

🖼 appears on the desk top.

Macintosh

🖼 appears in the OLYMPUS Master 2 folder.

● Browse window appears after starting the software.

⚠ When you start OLYMPUS Master 2 for the first time after installation, "Default Settings" and "Registration" screen appear. Follow the instructions on the screen.

Operating OLYMPUS Master 2

When OLYMPUS Master 2 is started, Quick Start Guide appears on the screen that helps you to handle the camera without any question. When the Quick Start Guide is not displayed, click [icon] in the tool bar to show the Guide.

For details on the operation, refer to the help guide of the software.

Transferring and saving images without using OLYMPUS Master 2

This camera is compatible with the USB Mass Storage Class. You can transfer and save the image data on your computer while the camera and the computer are connected.

System requirements

Windows : Windows 2000 Professional/
XP Home Edition/
XP Professional/Vista
Macintosh : Mac OS X v10.3 or later

On a computer running Windows Vista, if [MTP] is set for the submenu that appears by pressing ⓘ after selecting [PC] in Step 3 of **"Connecting the camera to a computer" (p. 39)**, Windows Photo Gallery will become available.

Even if a computer has USB ports, proper operation is not guaranteed in the following cases.
● computers with USB ports installed using an expansion card, etc.
● computers without a factory-installed OS and home-built computers

Usage Tips

If the camera does not work as intended, or if an error message is displayed on the screen, and you are unsure of what to do, refer to the information below to fix the problem(s).

Troubleshooting

Battery
"The camera does not work even when batteries are installed".

● Insert recharged batteries in the correct direction.

"Charging the battery" (p. 10), "Loading the battery (supplied) and the xD-Picture Card™ (sold separately) into the camera" (p. 11)

● Battery performance may have been reduced temporarily due to low temperature. Take the batteries out of the camera, and warm them by putting them in your pocket for a while.

Card/Internal memory
"An error message is displayed".

"Error message" (p. 42)

Shutter button
"No picture is taken when the shutter button is pressed".

● Cancel sleep mode.
To save battery power, the camera automatically goes into sleep mode and the monitor turns off if there is no operation for 3 minutes when the camera is turned on. No picture is taken even if the shutter button is fully pressed in this mode. Operate the zoom buttons or other buttons to restore the camera from sleep mode before taking a picture. If the camera is left for another 12 minutes, it automatically turns off. Press **POWER** to turn the camera on.

● Press ▶/○ button to set a shooting mode.

● Wait until ⚡ (flash charge) stops blinking before taking pictures.

Monitor
"Difficult to see".

● Condensation[1] may have occurred. Turn off the power, and wait for the camera body to become acclimated to the surrounding temperature and dry out before taking pictures.
  [1] Dew drops can form in the camera when it is suddenly taken from a cold location into a warm, humid room.

"Vertical lines appear on the screen".

● This condition may occur when the camera is pointed at an extremely bright subject under a clear sky and so on. The lines do not appear, however, in the final image.

"The light is caught in the picture".

● Shooting with flash in dark situations results in an image with many flash reflections on dust in the air.

Date and time function
"Date and time settings return to the default setting".

● If the batteries are removed and left out of the camera for about a day[2], the date and time settings return to the default setting, and must be reset.
  [2] The time until the date and time settings return to the default setting varies depending on how long the batteries have been loaded.

"Setting the date and time" (p. 13)
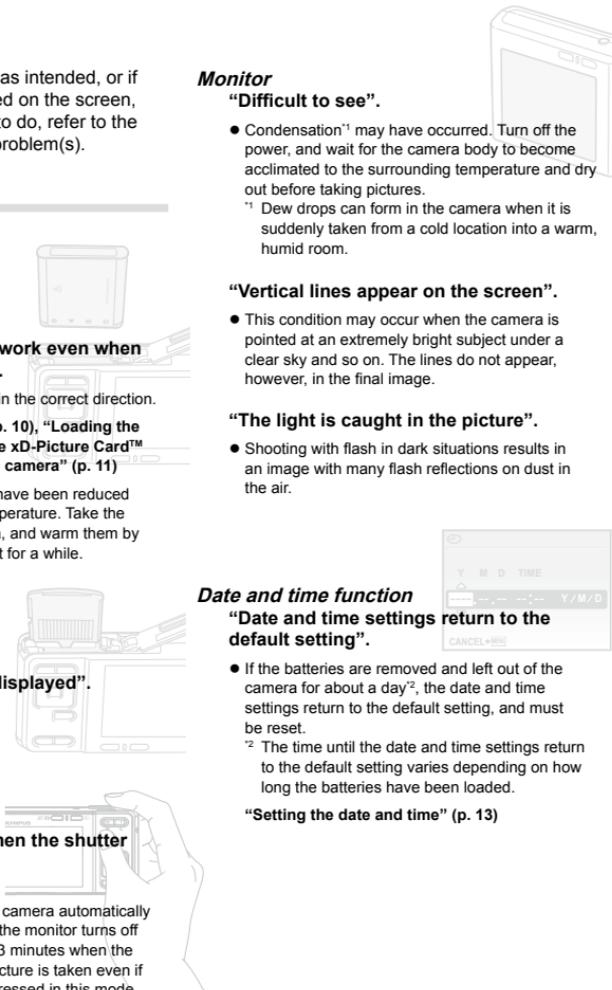

Error message

When one of the messages below is displayed on the monitor, check the corrective action.

| Error message	Corrective action
! **CARD ERROR**	**Card problem** Insert a new card.
! **WRITE PROTECT**	**Card problem** Use a computer to cancel the read-only setting.
! **MEMORY FULL**	**Internal memory problem** • Insert a card. • Erase unwanted images.*1
! **CARD FULL**	**Card problem** • Replace the card. • Erase unwanted images.*1
CARD SETUP CLEAN CARD FORMAT SET▸OK	**Card problem** • Use ◁/◦ to select [CLEAN CARD], and press the 🖳 button. Take out the card, wipe the contact area **(p. 46)** with a soft, dry cloth, and then load the card again. • Use ◁/◦ to select [FORMAT], and press the 🖳 button. Next, use ◁/◦ to select [YES], and press the 🖳 button.*2
MEMORY SETUP POWER OFF MEMORY FORMAT SET▸OK	**Internal memory problem** Use ◁/◦ to select [MEMORY FORMAT], and press the 🖳 button. Next, use ◁/◦ to select [YES], and press the 🖳 button.*2
NO PICTURE	**Internal memory/Card problem** Take pictures before viewing them.
! **PICTURE ERROR**	**Problem with selected image** Use photo retouch software, etc. to view the image on a computer. If the image still cannot be viewed, the image file is corrupted.
! **THE IMAGE CANNOT BE EDITED**	**Problem with selected image** Use photo retouch software, etc. to edit the image on a computer.

CARD-COVER OPEN	**Operation problem** Close the battery/card compartment cover.
BATTERY EMPTY	**Battery problem** Charge the battery.
NO CONNECTION	**Connection problem** Connect the camera and computer or printer correctly.
NO PAPER	**Printer problem** Load paper into the printer.
NO INK	**Printer problem** Refill the ink in the printer.
JAMMED	**Printer problem** Remove the jammed paper.
SETTINGS CHANGEDial *3	**Printer problem** Return to the status where the printer can be used.
!! **PRINT ERROR**	**Printer problem** Turn off the camera and printer, check the printer for any problems, and then turn the power on again.
! **CANNOT PRINT**al *4	**Problem with selected image** Use a computer to print.

*1 Before erasing important images, download them to a computer.
*2 All data will be erased.
*3 This is displayed, for instance, when the printer's paper tray has been removed. Do not operate the printer while making the print settings on the camera.
*4 This camera may be unable to print images taken by other cameras.

Shooting tips

When you are unsure of how to take a picture that you envision, refer to the information below.

Focusing

"Focusing on the subject"

● **Taking a picture of a subject not in the center of the screen**

After focusing on an object at the same distance as the subject, compose the shot, and take the picture.

Pressing the shutter button halfway (p. 14)

AF lock (p. 17)

● **Taking a picture of subjects where autofocus is difficult**

In the following cases, after focusing on an object (by pressing the shutter button halfway down) with high contrast at the same distance as the subject, compose the shot, and take the picture.
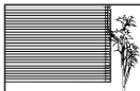

Subjects with low contrast

When extremely bright objects appear in the center of the screen

Object with no vertical lines[*1]

[*1] It is also effective to compose the shot by holding the camera vertically to focus, and then returning to the horizontal position to take the picture.

When objects are at different distances

Fast-moving object

The subject is not in the center of the frame

Camera shake

"Taking pictures without camera shake"

● **Taking pictures using ((☝)) mode (p. 18).**

● **Select ☇ (SPORT) in SCENE mode (p. 27)**

The ☇ (SPORT) mode uses a fast shutter speed and can reduce the blur incurred by a moving subject.

● **Taking pictures at a high ISO sensitivity.**

If a high ISO sensitivity is selected, pictures can be taken at a high shutter speed even at locations where a flash cannot be used.

[ISO] (p. 25)

Exposure (brightness)

"Taking pictures with the right brightness"

● **Taking pictures using [FACE DETECT] (p. 26)**

Appropriate exposure is obtained for a face against backlight, and the face is brightened.

● **Taking pictures using [FILL IN] (p. 19) flash**

A subject against backlight is brightened.

● **Taking pictures using exposure compensation (p. 19)**

Adjust the brightness while viewing the screen for taking the picture. Normally, taking pictures of white subjects (such as snow) results in images that are darker than the actual subject. Use the ☒ button to adjust in the positive direction to express whites as they appear. When taking pictures of black subjects, on the other hand, it is effective to adjust in the negative direction.

Color hue WB

"Taking pictures with colors at the same shade as they appear"

- **Taking pictures by selecting [WB] (p. 25)**

  Best results in most environments can normally be obtained with the AUTO setting, but for some subjects, you should try experimenting with different settings. (This is especially true for sunshade under a clear sky, mixed natural and artificial light settings, and so on.)

- **Taking pictures using [FILL IN] (p. 19) flash**

  Use of the flash is also effective for shooting under fluorescent and other artificial lighting.

Image quality

Taking sharper pictures

- **Taking pictures with the optical zoom**

  Avoid using digital zoom **(p. 19)** to take pictures.

- **Taking pictures at a low ISO sensitivity**

  If the picture is taken with a high ISO sensitivity, noise (small colored spots and color unevenness that were not in the original image) can occur, and the image can appear grainy. The resulting image is grainier than with low ISO sensitivity as well.

  [ISO] (p. 25)

Batteries

"Making batteries last longer"

- **Avoid any of the following operations when not actually taking pictures because they deplete the battery power.**

  - Repeatedly pressing the shutter button halfway

  - Repeatedly using the zoom

- **Set [POWER SAVE] (p. 33) to [ON].**

Playback/Editing tips

Playback

"Playing images in the internal memory and card"

"Loading the battery and the xD-Picture card™ (sold separately) into the camera" (p. 11)

"Using the microSD card/microSDHC card (sold separately)" (p. 12)

Editing

"Erasing the sound recorded to a still image"

- **Record over the sound with silence when playing back the image**

  "Adding sound to still images [Ψ]" (p. 29)

Appendix

Camera care

Exterior
• Wipe gently with a soft cloth. If the camera is very dirty, soak the cloth in mild soapy water and wring well. Wipe the camera with the damp cloth and then dry it with a dry cloth. If you have used the camera at the beach, use a cloth soaked in clean water and wrung well.

Monitor
• Wipe gently with a soft cloth.

Lens
• Blow dust off the lens with a commercial blower, then wipe gently with a lens cleaner.

Battery/Charger
• Wipe gently with a soft, dry cloth.

> ⚠ Do not use strong solvents such as benzene or alcohol, or chemically treated cloth.

> ⚠ Mold may form on the lens surface if the lens is left dirty.

Storage

• When storing the camera for extended periods, remove the battery and card, and keep in a cool, dry place that is well ventilated.
• Periodically insert the battery and test the camera functions.

> ⚠ Avoid leaving the camera in places where chemical products are handled since this may result in corrosion.
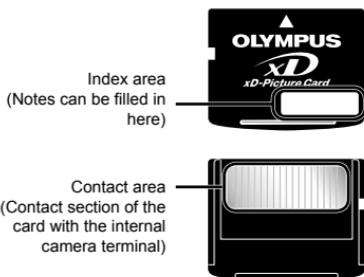

Battery and charger

• This camera uses one Olympus lithium ion battery (LI-42B/LI-40B). No other type of batteries can be used.
• Power consumption by the camera varies depending on which functions are used.
• During the conditions described below, power is consumed continuously and the battery becomes exhausted quickly.
  • The zoom is used repeatedly.
  • The shutter button is pressed halfway repeatedly in shooting mode, activating the auto focus.
  • A picture is displayed on the monitor for an extended period of time.
  • The camera is connected to a computer or printer.
• Using an exhausted battery may cause the camera to turn off without displaying the battery level warning.
• The rechargeable battery is not fully charged at the time of purchase. Charge the battery fully with the LI-40C charger before use.
• The provided rechargeable battery usually takes approximately 5 hours to charge (varies on usage).
• The supplied LI-40C battery charger is used only for LI-42B/LI-40B batteries. Do not charge any other type of battery with the supplied battery charger. It might cause explosion, leaking, overheating or fire.
• This power unit is intended to be correctly orientated in a vertical or floor mount position.

Using your charger abroad

• The charger can be used in most home electrical sources within the range of 100 V to 240 V AC (50/60Hz) around the world. However, depending on the country or area you are in, the AC wall outlet may be shaped differently and the charger may require a plug adapter to match the wall outlet. For details, ask at your local electrical shop or travel agent.
• Do not use travel voltage converters as they could damage your charger.

Using an xD-Picture Card

A card (and internal memory) also corresponds to the film that records images in a film camera. Otherwise, the recorded images (data) can be erased, and retouching is also available with the use of a computer. Cards can be removed from the camera and exchanged, but this is not possible with the internal memory. Use of larger capacity cards enables you to take more pictures.

Index area
(Notes can be filled in here)

Contact area
(Contact section of the card with the internal camera terminal)

⚠ Do not touch the contact area directly.

Cards compatible with this camera
xD-Picture Card (16MB to 2GB) (TypeH/M/M+, Standard)

Using a new card
Before using a non-Olympus card or a card that was used for another purpose in a computer or other device, use **[MEMORY FORMAT]/[FORMAT] (p. 31)** to format the card.

Checking the image saving location
The memory indicator shows whether the internal memory or card is being used during shooting and playback.

Current memory indicator
⒤N: Internal memory is being used
None: Card is being used

Current memory indicator

Shooting mode

Playback mode
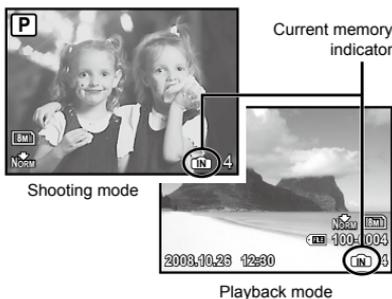

⚠ Even if [MEMORY FORMAT]/[FORMAT], [ERASE], [SEL. IMAGE], or [ALL ERASE] is performed, the data in the card is not completely erased. When disposing of the card, damage the card to prevent the disclosure of personal data.

Readout/recording process of the card
Never open the battery/card compartment cover while the camera is reading or writing data, which is indicated by blinking of the card access lamp. This can not only damage the image data but also render the internal memory or card unusable.
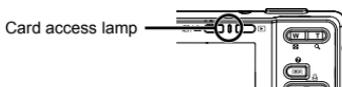

Card access lamp

Number of storable pictures (still pictures)/recording length (movies) in the internal memory and xD-Picture Card

Still images

IMAGE SIZE		COMPRES-SION	Number of storable still pictures			
			Internal memory		Using a 1GB xD-Picture Card	
			With sound	Without sound	With sound	Without sound
8M	3264×2448	FINE	4	4	221	223
		NORM	8	8	429	438
5M	2560×1920	FINE	7	7	353	359
		NORM	13	14	673	695
3M	2048×1536	FINE	11	11	566	576
		NORM	22	23	1,102	1,142
2M	1600×1200	FINE	18	19	913	940
		NORM	35	38	1,728	1,881
1M	1280×960	FINE	28	29	1,390	1,453
		NORM	52	59	2,558	2,907
VGA	640×480	FINE	93	118	4,568	5,814
		NORM	163	217	7,995	10,660
16:9	1920×1080	FINE	17	17	841	876
		NORM	33	35	1,640	1,728

Movies

IMAGE SIZE		FRAME RATE	Recording length			
			Internal memory		Using a 1 GB xD-Picture Card	
			With sound	Without sound	With sound	Without sound
VGA	640×480	30	10 sec.	11 sec.*	8 min. 54 sec.*	9 min. 5 sec.*
		15	21 sec.	22 sec.	17 min. 48 sec.	18 min. 11 sec.
QVGA	320×240	30	29 sec.	30 sec.	24 min. 2 sec.	25 min. 28 sec.
		15	58 sec.	1 min. 1 sec.	48 min. 4 sec.	50 min. 56 sec.

The maximum file size of a single movie is 2 GB, regardless of the capacity of the card.

* The maximum continuous recording length of a single movie will be 10 seconds.

Increasing the number of pictures that can be taken
Either erase unwanted images, or connect the camera to a computer or other device to save the images, and then erase the images in the internal memory or card.
[ERASE] (p. 16), [SEL. IMAGE] (p. 29), [ALL ERASE] (p. 29), [MEMORY FORMAT]/[FORMAT] (p. 31)

Using the microSD Attachment

⚠ Do not use the attachment with Olympus digital cameras that do not support this microSD Attachment, as well as with other brands of digital cameras, computers, printers, and other devices that support xD-Picture Card. Doing so not only may damage the pictures taken, but may also result in the malfunction of the device.

⚠ If the microSD card cannot be removed, do not use force. Contact authorized distributors/service centers.

Cards compatible with this camera
microSD card/microSDHC card

⚠ For a list of tested microSD cards, please visit our website (http://www.olympus.com/).

Sending images
You can send images to a computer or printer by using the USB cable provided with the camera.
To send data to other devices, remove the attachment from the camera and use a commercially available microSD card adapter.

Handling precautions
Do not touch the contact area of the attachment or microSD card. Doing so may cause failure in reading the images. When fingerprints or stains are found on the contact area, wipe the area with a soft dry cloth.

SAFETY PRECAUTIONS

⚡	**CAUTION** **RISK OF ELECTRIC SHOCK** **DO NOT OPEN**	⚠

CAUTION: TO REDUCE THE RISK OF ELECTRICAL SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED OLYMPUS SERVICE PERSONNEL.

⚠		An exclamation mark enclosed in a triangle alerts you to important operating and maintenance instructions in the documentation provided with the product.
⚠	DANGER	If the product is used without observing the information given under this symbol, serious injury or death may result.
⚠	WARNING	If the product is used without observing the information given under this symbol, injury or death may result.
⚠	CAUTION	If the product is used without observing the information given under this symbol, minor personal injury, damage to the equipment, or loss of valuable data may result.

WARNING!
TO AVOID THE RISK OF FIRE OR ELECTRICAL SHOCK, NEVER DISASSEMBLE, EXPOSE THIS PRODUCT TO WATER OR OPERATE IN A HIGH HUMIDITY ENVIRONMENT.

▌General Precautions

Read All Instructions — Before you use the product, read all operating instructions. Save all manuals and documentation for future reference.
Cleaning — Always unplug this product from the wall outlet before cleaning. Use only a damp cloth for cleaning. Never use any type of liquid or aerosol cleaner, or any type of organic solvent to clean this product.
Attachments — For your safety, and to avoid damaging the product, use only accessories recommended by Olympus.
Water and Moisture — For precautions on products with weatherproof designs, read the weatherproofing sections.
Location — To avoid damage to the product, mount the product securely on a stable tripod, stand, or bracket.
Power Source — Connect this product only to the power source described on the product label.
Foreign Objects — To avoid personal injury, never insert a metal object into the product.
Heat — Never use or store this product near any heat source such as a radiator, heat register, stove, or any type of equipment or appliance that generates heat, including stereo amplifiers.

Handling the Camera

⚠ **WARNING**

• **Do not use the camera near flammable or explosive gases.**
• **Do not use the flash and LED on people (infants, small children, etc.) at close range.**
  • You must be at least 1 m (3 ft.) away from the faces of your subjects. Firing the flash too close to the subject's eyes could cause a momentary loss of vision.
• **Keep young children and infants away from the camera.**
  • Always use and store the camera out of the reach of young children and infants to prevent the following dangerous situations which could cause serious injury:
    • Becoming entangled in the camera strap, causing strangulation.
    • Accidentally swallowing the battery, cards or other small parts.
    • Accidentally firing the flash into their own eyes or those of another child.
    • Accidentally being injured by the moving parts of the camera.
• **Do not look at the sun or strong lights with the camera.**
• **Do not use or store the camera in dusty or humid places.**
• **Do not cover the flash with a hand while firing.**
• **Do not insert anything into the microSD attachment other than the microSD card.**
  Other types of cards cannot be inserted into microSD Attachment.
• **Do not insert anything other than an xD-Picture Card or the microSD Attachment into the camera.**
  If you insert a card by mistake, such as a microSD card, do not use force. Contact authorized distributors/service centers. Damages such as scratches on the microSD Attachment or card could result in the camera overheating and/or malfunctioning.

⚠ **CAUTION**

• **Stop using the camera immediately if you notice any unusual odors, noise, or smoke around it.**
  • Never remove the batteries with bare hands, which may cause a fire or burn your hands.
• **Never hold or operate the camera with wet hands.**
• **Do not leave the camera in places where it may be subject to extremely high temperatures.**
  • Doing so may cause parts to deteriorate and, in some circumstances, cause the camera to catch fire. Do not use the charger if it is covered (such as a blanket). This could cause overheating, resulting in fire.
• **Handle the camera with care to avoid getting a low-temperature burn.**
  • When the camera contains metal parts, overheating can result in a low-temperature burn. Pay attention to the following:
    • When used for a long period, the camera will get hot. If you hold on to the camera in this state, a low-temperature burn may be caused.
    • In places subject to extremely cold temperatures, the temperature of the camera's body may be lower than the environmental temperature. If possible, wear gloves when handling the camera in cold temperatures.
• **Be careful with the strap.**
  • Be careful with the strap when you carry the camera. It could easily catch on stray objects and cause serious damage.

Battery Handling Precautions

Follow these important guidelines to prevent batteries from leaking, overheating, burning, exploding, or causing electrical shocks or burns.

⚠ DANGER

• The camera uses a lithium ion battery specified by Olympus. Charge the battery with the specified charger. Do not use any other chargers.
• Never heat or incinerate batteries.
• Take precautions when carrying or storing batteries to prevent them from coming into contact with any metal objects such as jewelry, pins, fasteners, etc.
• Never store batteries where they will be exposed to direct sunlight, or subjected to high temperatures in a hot vehicle, near a heat source, etc.
• To prevent causing battery leaks or damaging their terminals, carefully follow all instructions regarding the use of batteries. Never attempt to disassemble a battery or modify it in any way, solder, etc.
• If battery fluid gets into your eyes, flush your eyes immediately with clear, cold running water and seek medical attention immediately.
• Always store batteries out of the reach of small children. If a child accidentally swallows a battery, seek medical attention immediately.

⚠ WARNING

• Keep batteries dry at all times.
• To prevent batteries from leaking, overheating, or causing a fire or explosion, use only batteries recommended for use with this product.
• Insert the battery carefully as described in the operating instructions.
• If rechargeable batteries have not been recharged within the specified time, stop charging them and do not use them.
• Do not use a battery if it is cracked or broken.
• If a battery leaks, becomes discolored or deformed, or becomes abnormal in any other way during operation, stop using the camera.
• If a battery leaks fluid onto your clothing or skin, remove the clothing and flush the affected area with clean, running cold water immediately. If the fluid burns your skin, seek medical attention immediately.
• Never subject batteries to strong shocks or continuous vibration.

⚠ CAUTION

• Before loading, always inspect the battery carefully for leaks, discoloration, warping, or any other abnormality.
• The battery may become hot during prolonged use. To avoid minor burns, do not remove it immediately after using the camera.
• Always unload the battery from the camera before storing the camera for a long period.

Caution for Usage Environment

• To protect the high-precision technology contained in this product, never leave the camera in the places listed below, no matter if in use or storage:
  • Places where temperatures and/or humidity are high or go through extreme changes. Direct sunlight, beaches, locked cars, or near other heat sources (stove, radiator, etc.) or humidifiers.
  • In sandy or dusty environments.
  • Near flammable items or explosives.
  • In wet places, such as bathrooms or in the rain. When using products with weatherproof designs, read their manuals as well.
  • In places prone to strong vibrations.
• Never drop the camera or subject it to severe shocks or vibrations.
• When mounted on a tripod, adjust the position of the camera with the tripod head. Do not twist the camera.
• Do not touch electric contacts on cameras.
• Do not leave the camera pointed directly at the sun. This may cause lens or shutter curtain damage, color failure, ghosting on the CCD, or may possibly cause fires.
• Do not push or pull severely on the lens.
• Before storing the camera for a long period, remove the batteries. Select a cool, dry location for storage to prevent condensation or mold from forming inside the camera. After storage, test the camera by turning it on and pressing the shutter button to make sure that it is operating normally.
• Always observe the operating environment restrictions described in the camera's manual.

Battery Handling Precautions

• This camera uses a lithium ion battery specified by Olympus. Do not use any other type of battery.
• If the battery's terminals get wet or greasy, camera contact failure may result. Wipe the battery well with a dry cloth before use.
• Always charge a battery when using it for the first time, or if it has not been used for a long period.
• When operating the camera with battery power at low temperatures, try to keep the camera and spare battery as warm as possible. A battery that has run down at low temperatures may be restored after it is warmed at room temperature.
• The number of pictures you can take may vary depending on the shooting conditions or battery.
• Before going on a long trip, and especially before traveling abroad, purchase extra batteries. A recommended battery may be difficult to obtain while traveling.
• Please recycle batteries to help save our planet's resources. When you throw away dead batteries, be sure to cover their terminals and always observe local laws and regulations.

LCD Monitor

• Do not push the monitor forcibly; otherwise the image may become vague, resulting in a playback mode failure or damage to the monitor.
• A strip of light may appear on the top/bottom of the monitor, but this is not a malfunction.
• When a subject is viewed diagonally in the camera, the edges may appear zigzagged on the monitor. This is not a malfunction; it will be less noticeable in playback mode.
• In places subject to low temperatures, the LCD monitor may take a long time to turn on or its color may change temporarily. When using the camera in extremely cold places, it is a good idea to occasionally place it in a warm place. An LCD monitor exhibiting poor performance due to low temperatures will recover in normal temperatures.
• The LCD used for the monitor is made with high-precision technology. However, black spots or bright spots of light may appear constantly on the LCD Monitor. Due to its characteristics or the angle at which you are viewing the monitor, the spot may not be uniform in color and brightness. This is not a malfunction.

Legal and Other Notices

• Olympus makes no representations or warranties regarding any damages, or benefit expected by using this unit lawfully, or any request from a third person, which are caused by the inappropriate use of this product.
• Olympus makes no representations or warranties regarding any damages or any benefit expected by using this unit lawfully which are caused by erasing picture data.

Disclaimer of Warranty

• Olympus makes no representations or warranties, either expressed or implied, by or concerning any content of these written materials or software, and in no event shall be liable for any implied warranty of merchantability or fitness for any particular purpose or for any consequential, incidental or indirect damages (including but not limited to damages for loss of business profits, business interruption and loss of business information) arising from the use or inability to use these written materials or software or equipment. Some countries do not allow the exclusion or limitation of liability for consequential or incidental damages, so the above limitations may not apply to you.

For customers in Europe

"CE" mark indicates that this product complies with the European requirements for safety, health, environment and customer protection. "CE" mark cameras are intended for sales in Europe.

This symbol [crossed-out wheeled bin WEEE Annex IV] indicates separate collection of waste electrical and electronic equipment in the EU countries.
Please do not throw the equipment into the domestic refuse.
Please use the return and collection systems available in your country for the disposal of this product.

This symbol [crossed-out wheeled bin Directive 2006/66/EC Annex II] indicates separate collection of waste batteries in the EU countries.
Please do not throw the batteries into the domestic refuse. Please use the return and collection systems available in your country for the disposal of the waste batteries.

Use Only Dedicated Rechargeable Battery and Battery Charger

We strongly recommend that you use only the genuine Olympus dedicated rechargeable battery and battery charger with this camera. Using a non-genuine rechargeable battery and/or battery charger may result in fire or personal injury due to leakage, heating, ignition or damage to the battery. Olympus does not assume any liability for accidents or damage that may result from the use of a battery and/or battery charger that are not genuine Olympus accessories.

Provisions of warranty

1   If this product proves to be defective, although it has been used properly (in accordance with the written "Safety Precautions" and Operating instructions supplied with it), during a period of two years from the date of purchase from an authorized Olympus distributor within the business area of Olympus Imaging Europa GmbH as stipulated on the website: http://www.olympus. com this product will be repaired, or at Olympus's option replaced, free of charge. To claim under this warranty the customer must take the product and this Warranty Certificate before the end of the two year warranty period to the dealer where the product was purchased or any other Olympus service station within the business area of Olympus Imaging Europa GmbH as stipulated on the website: http://www.olympus.com. During the one year period of the World Wide Warranty the customer may turn the product in at any Olympus service station. Please notice that not in all countries such Olympus service station exists.

2 The customer shall transport the product to the dealer or Olympus authorized service station at his own risk and shall be responsible for any costs incurred in transporting the product.

3 This warranty does not cover the following and the customer will be required to pay repair charge, even for defects occurring within the warranty period referred to above.

a. Any defect that occurs due to mishandling (such as an operation performed that is not mentioned in the "Safety Precautions" or other sections of the instructions, etc.)

b. Any defect that occurs due to repair, modification, cleaning, etc. performed by anyone other than Olympus or an Olympus authorized service station.

c. Any defect or damage that occurs due to transport, a fall, shock, etc. after purchase of the product.

d. Any defect or damage that occurs due to fire, earthquake, flood damage, thunderbolt, other natural disasters, environmental pollution and irregular voltage sources.

e. Any defect that occurs due to careless or improper storage (such as keeping the product under conditions of high temperature and humidity, near insect repellents such as naphthalene or harmful drugs, etc.), improper maintenance, etc.

f. Any defect that occurs due to exhausted batteries, etc.

g. Any defect that occurs due to sand, mud, etc. entering the inside of the product casing.

h. When this Warranty Certificate is not returned with the product.

i. When any alterations whatsoever are made to the Warranty Certificate regarding the year, month and date of purchase, the customer's name, the dealer's name, and the serial number.

j. When proof of purchase is not presented with this Warranty Certificate.

4 This Warranty applies to the product only; the Warranty does not apply to any other accessory equipment, such as the case, strap, lens cap and batteries.

5 Olympus's sole liability under this warranty shall be limited to repairing or replacing the product. Any liability for indirect or consequential loss or damage of any kind incurred or suffered by the customer due to a defect of the product, and in particular any loss or damage caused to any lenses, films, other equipment or accessories used with the product or for any loss resulting from a delay in repair or loss of data, is excluded. Compelling regulations by law remain unaffected by this.

Notes regarding warranty maintenance

1 This warranty will only be valid if the Warranty Certificate is duly completed by Olympus or an authorized dealer or other documents contain sufficient proof. Therefore, please make sure that your name, the name of the dealer, the serial number and the year, month and date of purchase are all completed or the original invoice or the sales receipt (indicating the dealer's name, the date of purchase and product type) is attached to this Warranty Certificate. Olympus reserves the right to refuse free-of-charge service if neither Warranty Certificate is completed nor the above document is attached or if the information contained in it is incomplete or illegible.

2 Since this Warranty Certificate will not be re-issued, keep it in a safe place.

* Please refer to the list on the website: http://www.olympus.com for the authorized international Olympus service network.

SPECIFICATIONS

Camera

Product type	:	Digital camera (for shooting and displaying)
Recording system		
Still pictures	:	Digital recording, JPEG (in accordance with Design rule for Camera File system (DCF))
Applicable standards	:	Exif 2.2, Digital Print Order Format (DPOF), PRINT Image Matching III, PictBridge
Sound with still pictures	:	Wave format
Movie	:	AVI Motion JPEG
Memory	:	Internal memory xD-Picture Card (16 MB to 2 GB) (TypeH/M/M+, Standard) microSD card/microSDHC card (when the supplied microSD Attachment is used.)
No. of effective pixels	:	8,000,000 pixels
Image pickup device	:	1/2.35" CCD (primary color filter), 8,500,000 pixels (gross)
Lens	:	Olympus lens 6.3 to 18.9 mm, f3.1 to 5.9 (equivalent to 36 to 108 mm on a 35 mm camera)
Photometric system	:	Digital ESP metering system
Shutter speed	:	4 to 1/2000 sec.
Shooting range	:	0.6 m (2.0 ft.) to ∞ (W), 1.0 m (3.3 ft.) to ∞ (T) (normal) 0.1 m (0.3 ft.) to ∞ (W), 0.6 m (2.0 ft.) to ∞ (T) (macro mode) 0.05 m (0.16 ft.) (super macro mode)
Monitor	:	2.5" TFT color LCD display, 154,000 dots
Connector	:	Multi-connector (USB connector, A/V OUT jack)
Automatic calendar system	:	2000 up to 2099
Operating environment		
Temperature	:	0 °C to 40 °C (32 °F to 104 °F) (operation) / -20 °C to 60 °C (-4 °F to 140 °F) (storage)
Humidity	:	30 % to 90 % (operation)/10 % to 90 % (storage)
Power supply	:	One Olympus lithium ion battery (LI-42B / LI-40B)
Dimensions	:	FE-360/X-875/C-570: 93.9 mm (W) × 55.6 mm (H) × 20.3 mm (D) (3.7 × 2.2 × 0.8 in.) (excluding protrusions) FE-20/X-15/C-25: 95.9 mm (W) × 57.2 mm (H) × 21.5 mm (D) (3.8 × 2.3 × 0.8 in.) (excluding protrusions)
Weight	:	FE-360/X-875/C-570: 99 g (3.5 oz) (excluding battery and card) FE-20/X-15/C-25: 88 g (3.1 oz) (excluding battery and card)

Lithium ion battery (LI-42B)

Product type	:	Lithium ion rechargeable battery
Standard voltage	:	DC 3.7 V
Standard capacity	:	740 mAh
Battery life	:	Approx. 300 full charges (varies on usage)
Operating environment		
Temperature	:	0°C to 40°C (32°F to 104°F) (charging) / -10°C to 60°C (14°F to 140°F) (operation) / -20°C to 35°C (-4°F to 95°F) (storage)
Dimensions	:	31.5 mm (W) × 39.5 mm (H) × 6.0 mm (D) (1.2 × 1.5 × 0.2 in.)
Weight	:	Approx. 15 g (0.5 oz)

Battery charger (LI-40C)

Power requirements	:	AC 100 to 240 V (50 to 60 Hz)
Output	:	DC 4.2 V, 200 mA
Charging time	:	Approx. 5 hours
Operating environment		
Temperature	:	0 °C to 40 °C (32 °F to 104 °F) (operation) / -20 °C to 60 °C (-4 °F to 140 °F) (storage)
Dimensions	:	62.0 mm (W) × 23.0 mm (H) × 90.0 mm (D) (2.4 × 0.9 × 3.5 in.)
Weight	:	Approx. 65 g (2.5 oz)

microSD Attachment

Product type	:	Attachment for microSD card
Operating Environment		
Temperature	:	-10 to 40 °C (14 °F to 104 °F) (operation) / -20 to 65 °C (-4 °F to 149 °F) (storage)
Humidity	:	95 % and below (operation) / 85 % and below (storage)
Dimensions	:	25.0 mm (W) x 20.3 mm (H) x 1.7 mm (D) (1.0 × 0.8 × 0.07 in.) (Handle:2.2 mm (0.09 in.))
Weight	:	Approx. 0.9 g (0.03 oz)

Design and specifications subject to change without notice.
