Safety Tips

- Do not use this product for any purpose other than described in this document.
- Use caution opening the contents of the package to avoid injuries.
- Do not use earphones while riding a bike, driving a car, walking, or exercising. It may disturb your concentration and lead to an accident.
- Avoid any exposure to extreme moisture. Damage from moisture constitutes user's negligence and will not be covered by manufacturer's warranty.
- Disassembling or modifying the device will void any warranty.
- Make sure the USB connection is made correctly to avoid any damage to the device or the PC. Avoid extreme bending or pressuring the connection.
- Avoid any excessive force or impact. If there is an unusual odor such as burning smell or excessive heating during use, stop using the device immediately and contact us through www.COWON.com
- Do not use the player with wet hands as it may cause damage and malfunctions.
- Listening at high volume (over 85dB) for extended period of time is highly discouraged, as it may cause hearing problems.
- Use your player in well-lit places. Watching LCD screen in dark for extended period of time may increase eye strains and may cause sight problems.
- Avoid using the player at a location where static electricity is frequent
- Before any repair service, you should back up all data from the player. COWON SYSTEMS, INC. shall not be liable for any loss of data or files during the repair.
- Only use the AC adapter and USB cable provided by COWON SYSTEMS, INC.
- During lightning or thunderstorms, disconnect the player from the PC or AC adapter to avoid a risk of power surge or fire hazard.
- Store the player away from direct sunlight, excessive heat, fire and extreme cold environments. Excessive temperature can damage the exterior, interior circuits or the display.
- When using the player as a portable storage device, important data should be backed up as frequently possible. COWON SYSTEMS, INC. shall not be responsible for any unexpected data loss.
- Price of the player may fluctuate depending on the market condition, COWON SYSTEMS, INC. shall not compensate for any loss caused by price fluctuation.

1. iAUDIO U5 at a Glance

iAUDIO U5 is a unique multimedia player developed and manufactured by COWON SYSTEMS, Inc. It is a portable ultra-compact digital audio device that plays audio files such as MP3. iAUDIO U5 also offers FM radio listening/recording, and voice recording through a built-in microphone.

Highly portable, stylish and super-slim design with a neck strap

iAUDIO U5's ultra-slim size of 41.1 x 85.1 x 9.3 mm(earphone module excluded) provides portability and convenience.

24 hours of continuous playback with the embedded lithium polymer battery

The ultra power-saving circuit of iAUDIO U5 enables up to 24 hours of continuous playback with a fully charged battery. (Based on company test results.)

Powerful sound output of 64mW

When used with earphones of 16 ohm impedance, the maximum total sound output can reach up to 64mW for two channels (32mW +32mW) producing powerful and yet smooth sound qualities

Voice recording

Voice recording is available using the built-in microphone. This feature is particularly convenient for recording meetings or lectures.

Listening/recording of FM broadcasts

You can listen to FM radio broadcasts and record them at the same time. You can also save Preset channels for easy selection of your favorite FM radio stations.

Wide and vivid color TFT LCD display

With 1.8 inch and 65,000 color TFT LCD (Organic Light Emitting Diode), you can conveniently check the operational status of iAUDIO U5. It also supports multiple languages with display capability for over 40,000 different letters with embedded international fonts.

World's most powerful sound effects

iAUDIO U5 provides the most unique, powerful and high quality sound, which is recognized worldwide. You can take advantage of the following sound effects to suit your favorite music:

BBE: Sound effects that provide the clearest music.

Mach3Bass: A bass booster that enhances super low-end bass.

MP Enhance: Sound effects that compensate for missing sound segments in MP3s.

3D Surround: Three-dimensional surround sound effect.

Easily upgradeable firmware

We may occasionally release firmware upgrades to incorporate improvements to the device and suggestions that users provide to us. You can easily upgrade your iAUDIO U5 with the firmware download feature.

Convenient features for learning language

iAUDIO U5 provides useful features such as section repeat, section search, bookmarks and playback speed controls. These convenient features are ideal for learning language

Timer function

U5 also offers convenience of internal timer function with alarm and timed recording.

Portable storage device

iAUDIO U5 is immediately recognized by a PC as a removable drive as soon as it is connected to a PC through a USB cable. No software installation is required to use it as a storage device.

COWON MediaCenter - JetAudio software

World famous integrated multimedia playback software, COWON MediaCenter - JetAudio is included in your package.

2. Package contents

iAUDIO U5

Earphone

Quick Guide,
Install CD(with Serial Number)

USB Cable

AC Adapter (optional)

- Charge product with the USB connection jack and cable.
- The images of the package components are for your reference only and may differ from the actual item.

3. Features and specification

- Supports Windows Media DRM 10
- MP3, WMA, WAV FM Radio/Voice recording
- Built-In Flash Memory 2G, 4GB, 8GB
- High-Speed USB 2.0 Interface
- 1.8 inch TFT LCD display with 128x160 resolution and 65K colors.
- Long Continuous Playback Time: Up to 24hours (Based on company test result. Play time may be shortened if TFT LCD is used often.) Multi-language support
- Enhanced music file browser
- Play/Pause during Playback, Record/Pause during Recording
- Next Track/Previous Track, Fast Forward/Fast Rewind, Infinite Loop
- Resume, Fade In, Auto Play feature support
- Search Speed, Skip Speed Setting
- Digital Volume Control :40 levels
- Various EQ and Sound Effects (JetEffect)
 - User adjustable 5-band EQ
 - Normal, Rock, Pop, Metal, Jazz, Classic, Vocal, User
 - BBE, Mach3Bass, MP Enhance, 3D Surround, Pan, EQ Filter
- Support Clock, Alarm, Scheduled Recording, Sleep Timer, Auto Power -Off
- Auto display off feature to save battery power and screen burnout
- Easy firmware download and upgrade
- Title Display with ID3Tag or File Name
- Support M3U
- Display Product Info (Firmware version, Total capacity, Total usage)
- USB Data Transfer Support for MAC OS (9.X, 10.X) and Linux (v2.2 and higher)

Software

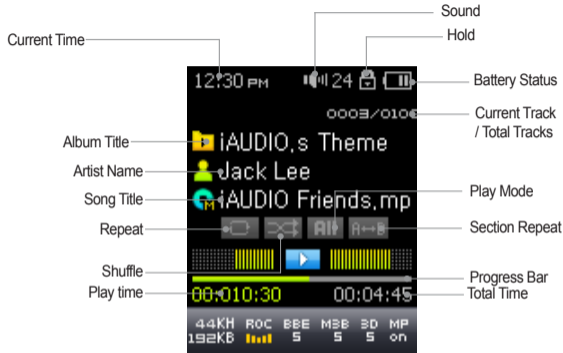

- COWON MediaCenter(JetAudio) – Powerful multimedia software with audio/video conversion & strong device management feature.

Supported File Formats	MP3 : MPEG 1/2/2.5 Layer 3, ~320Kbps, ~48KHz, mono/stereo WMA : ~320Kbps, ~48KHz, mono/stereo WAV : ~48KHz, 16bit, mono/stereo
FM Radio	Frequency Range : 87.5MHz ~ 108MHz, 76MHz ~ 108MHz (Japan Wide)
Memory	2GB / 4GB / 8GB
USB Interface	High Speed USB 2.0
File Transfer Rate	Max 35Mbps (Upload Max 40Mbps)
Power Supply	Built-in Rechargeable 3.7V Lithium Polymer battery(Max. 24 hours of continuous playback based on company test)
Charging Time	About 2 hours (either USB or Adapter)
Buttons	Power/Hold , PLAY, REC, FF, REW, VOL+, VOL-, MENU
Display	1.8 inch 128x160 dots, 65,000 Color TFT LCD
SNR	95dB (A-Weighted)
Output Frequency	20Hz~20KHz
Output	16 Ohm earphones : 32mW + 32mW
Dimension	iAUDIO U5: 41.1 x 85.1 x 9.3 mm (Width x Length x Thickness)
Weight	iAUDIO U5: 35g (including lithium polymer battery)

4. Identifying the Parts

5. TFT LCD Display

The battery status icon indicates how much battery is left. The number of segments in the icon decreases as the battery discharges. For some batteries or rechargeable batteries, the number of segments in the battery icon may increase or decrease irregularly when the remaining charge is being measured. This is normal.

When the battery runs out, the battery icon starts to blink. If this happens, the player will automatically power off after about 30 minutes.

6. Charging iAUDIO U5

- If your player is being used for the first time or if it has not been charged for a long time, make sure player is charged fully before using it
- To charge iAUDIO U5, connect the player to a PC using a USB cable or connect to the AC provided adapter only.

(a) Using an AC adapter (sold separately)

- Connect the AC adapter to an electrical outlet and the USB jack of the player
- Once connected, the player will automatically turn on and start charging
- Once the player is fully charged, the charge complete screen will appear as shown.

- Genuine COWON AC adapter is sold separately and works for both 100V and 240V.
- For your safety, use only the adapter supplied by the manufacturer.

(b) Using a PC connection

- i. Connect the supplied USB cable to the USB jack of the player and directly to your computer. The connection to an external USB hub is not supported. The player must be directly connected to the PC via a USB cable.
- ii. If the connection is made properly, the player will display an image showing charging status.
- iii. To check the charging status, run 'Safely Remove Hardware' wizard on your PC. Then iAUDIO U5 will display charging status on its screen.
- iv. Slow charging is recommended for notebooks and other devices that use battery power. See section 4.7 on changing the charging speed of iAUDIO

7. Windows 98 Driver Setup

When using Windows 98 or 98 SE, you need to install hardware driver for the PC to recognize the player.

•Windows 2000 and later versions automatically recognize the player.

■ Installing the driver

1. Connect the player to your PC using the supplied USB cable.

2. “Add New Hardware Wizard” will appear as shown. Click “Next”.

3. Click “Search for the best driver for your device (Recommended)”, and then click “Next”

4. Click “Specify a location” and click “Browse” button.

5. Select “Win98” folder in the installation CD and then click “Next” button. Drivers are also available for download from www.COWON.com.

6. Once the drivers are recognized, click “Next”.

7. Continue to click “Next”

8. Click the “Finish” button to complete the driver installation. The newly added drive can be seen in Device Manager or Explorer.

8. Connecting to PC and Transferring Files

1. Connect the player to a PC using the supplied USB cable.
2. When connected, the screen will show the following screen.
3. The iAUDIO drive will appear as shown and can be accessed like a disk drive using Windows Explorer
4. Launch Windows File Explorer or JetAudio.
5. You can copy any files including MP3 files to and from "iAUDIO" Drive
6. To disconnect the player from the PC, first make sure that file transfers are complete and then, single-click on  icon on the windows tray.
7. Click on the following pop-up message when it appears 
8. When "Safely Remove Hardware" message appears, and the TFT LCD displays a battery you may disconnect the USB cable.

- The iAUDIO U5 can recognize up to 500 folders and 2000 files.- If iAUDIO drive does not appear in either My Computer or Windows Explorer, check the connection and settings, and then re-connect (Separate driver installation is required for Windows 98).
- If the USB cable is connected after running 'Safely Remove Hardware' wizard from the steps listed above, the player stays in the battery charging mode. To access its memory, iAUDIO must be disconnected first and reconnected.
- If the device is connected through a USB HUB, the device won't be charged. The device must be connected directly to a USB port installed on a PC.
- The 'safely remove hardware' icon may not appear in windows 98/98SE. In such case, close JetAudio, then remove USB cable to disconnect.
- If the following message appears, run Safely Remove Hardware after a few minutes.

1. Quick Start Guide

1. Connect the earphone/neckstrap module to the player
2. Pull Power switch upwards to turn on.
3. After the splash screen and logo is displayed, the standby screen appears.
(It may start playback if automatic play is selected in Settings.)
4. Press the button to play or pause music
5. Pressing the buttons allows selection of previous and next tracks as well as fast forward and rewind the current track.
6. Pull power switch upwards during playback to turn off.

2. Basic Controls

3 Feature modes (Music, FM Radio, and Recorder), Settings mode, and Browser mode are available in iAUDIO U5.

Press [MENU] Once: Music Browser Mode

Press [MENU] Twice: Main Menu

Use UP/DOWN buttons to navigate through music files, and use <<, PLAY, >> buttons to movie in/out of folders in music browser mode.

To change the values for items in Settings mode, press up or down buttons and selected values are applied immediately. To cancel a task in mode selection screen or in settings mode and return to the standby screen, press a button.

	Music Browser mode	Preset mode	Main Menu mode	Settings mode
	Moves to the upper folder	Cancel	Moves to the left	Exit from settings option
	Opens folder Plays music	Displays Popup menu Selects popup menu	Selects mode	Chooses an item Applies changes
	Opens folder		Moves to the right	Chooses and opens an item
	Moves cursor up	Moves cursor up	Volume Up	Moves cursor up Increases the value of selected item
	Displays Main Menu	Displays Main Menu	Moves to Default mode	Cancels changes Moves to Default Mode
	Moves cursor down	Moves Cursor Down	Volume Down	Moves cursor down Lowers the value of selected item

- In Music Mode: Music browser mode for file browsing
- In FM Radio Mode: Preset mode for preset setting/searching

1. Playing Audio Files

■ Playing Audio

1. After turning on the power, change the player mode to either Music
2. Press the  button to play music files.
3. Press the  button during playback to pause the media files
4. Press the   buttons briefly to play previous or next tracks
5. During the playback, press the   buttons to rewind or fast-forward the current track.

- If Auto play is enabled in the Settings menu, the player starts the playback upon power on.
- If Resume is enabled in the Settings menu, iAUDIO will resume automatically playback from the position where it was previously turned off.
- If a large number of files are stored in the player, it may take the player longer time to respond
- The player can recognize maximum number of 2000 media files and 500 folders
(This limit refers to playable music and does not include other file types)

■ Using Section Repeat

Section Repeat allows you to set a specific part of a track to play repeatedly.

1. To enable section repeat feature, press "REC" during playback to set starting point (marked by **A↔B** icon in LCD screen).
2. Press "REC" again to set stopping point. (**A↔B** icon appears)
3. Press "REC" again to cancel the feature.

- Minimum 1 second is required for section repeat to work.
- Section repeat function will be cancelled if another track is selected.

2. Using FM Radio

■ Listening to FM Radio

1. Turn on the player and then select the FM Radio mode.
2. Press buttons briefly to change the tuning frequency at 0.1Mhz step
3. Press and hold buttons scan for the nearest FM radio station with good reception

- If unit turned off while listening, radio resumes upon restart.
- Earphone wire works as an antenna for FM Radio signals and thus improves the quality of reception when straightened.

■ Setting and Using Preset Channels

Setting preset channels to favorite stations avoids manual scanning through all frequencies.

1. After the player is turned on, select the FM Radio mode.
2. Tune to the favorite station and press  button to change to a PRESET list.
3. Press +, - buttons to highlight the desired preset channel and then press and hold  button to open a pop-up window.
4. Select “Save Current Ch” to add the currently selected frequency to the PRESET list.
5. Listen to the preset channels by selecting “Listen Ch” or delete preset channels by selecting “Delete Ch”
6. In FM Radio tuning mode, pressing  button switches to PRESET scanning mode and “PRESET” appears on the screen.
7. Pressing  button in the PRESET scanning mode returns to FM tuning mode. The “PRESET” will disappear

–If there are no frequencies in Preset mode, the tuning frequency will not change.

–Up to 24 frequencies can be stored in Preset Channels.

■ Recording FM Radio

Using Advanced Features

1. After the player is turned on, select the FM Radio mode.
2. Set the tuning frequency to the desired radio station.
3. Press "REC" button to start recording.
4. Press "REC" button again during a record to stop recording.

■ Scheduled Recording of FM Radio

1. Set the correct time on iAUDIO. Refer to section 4.6.
2. In the Settings / Timer menu, select the Wakeup Mode and set it to FM Recording
3. In the Settings / Timer menu, select the Wakeup Time and set it to desired time for recording.
4. The player will turn on automatically at the specified time and starts recording the FM Radio signal

- To check recorded files, open Music Browser then move to Folder – RECORD.
- During recording, battery consumption is higher than other playback operation.
- Sound quality and capacity of recordings may vary according to reception quality and recording settings. See the section 4.8 for further information

3. Recording Using Built-In Microphone

■ Recording with Built-in Microphone

1. Turn on the power using the “PLAY” button and switch to the Record mode by pressing  button twice and then choosing Record icon.
2. Press “” button to start recording via built-in microphone
3. Press and hold  button to start recording with the built-in microphone
During recording, press the  button to pause or resume the recording.
4. Press “” button again to stop recording.
5. To play recorded files, press  button and listen on the earphones

- Play recorded files in Music mode to use enhanced playback features such as JetEffect, FF/RW, and etc.
- Recorded files are automatically stored in “RECORD-VOICE” folder in the root directory.
- Recorded files are stored in “VOICE” folder if recorded via built-in microphone.
- To use JetEffect, Fast-forward and rewinding capabilities, the recorded audio files should be played in Music mode.
- If the player was in Record mode before turning the player off, the player will start with the Record mode when turned on again.
- Sound quality and capacity of recordings may vary according to reception quality and recording settings. See the section 4.8 for further information

1. Settings Menu List

Menu	Music FM Radio Voice Rec. Settings ▶
JetEffect	Equalizer BBE Mach3Bass MP Enhance 3D Surround Pan Play Speed Advanced EQ JetEffect Preset
Play Mode	Boundary Repeat Shuffle
Display	Language Title Play Time Scrollspeed Auto Display Off Brightness

System	Load Default USB Connection Format HDS Information
Information	

- Settings menu may change after a firmware upgrade.
- Display language in the Setting menu is described in section 4.5
- Settings menu operation is described in section 2.1 - 2.2

2. Menu Screen

In this screen, you can select a Music, FM Radio, Recording or Settings mode.

3. JetEffect

1. Equalizer

- Use the preset settings or manually set 5 Band Equalizers(EQ). Preset EQ settings include Normal, Rock, Metal, Jazz, Classic, Pop, and Vocal. Each preset EQ can be edited to match user's preference.

2. BBE

- BBE is the sound effect that provides clear music

3. Mach3Bass

- Mach3Bass is the base booster that enhances super low-end bass.

4. MP Enhance

- MP Enhance: Sound effect that compensate for missing sound segments

5. 3D Surround

- 3D Surround provides three dimensional sound effects.

6. Pan

- Pan adjusts the left and right volume balance.

7. Play Speed

- Adjusts playback speed.
*not available for music files with sampling rate lower than 44KHz

8. Advanced EQ

- Adjusts EQ values and select SAVE or LOAD.

9. JetEffect Preset

- To save current JetEffect settings or load the previous settings, press and hold  button to open pop-up window and select SAVE or LOAD.

- Excessive JetEffect settings may strain sound and generate noise
- For further information regarding JetEffect, refer to BBE MP at our website: www.COWON.com

4. Play Mode

1. Boundary

- This function sets the various ranges of files and folders.
- Boundary function is not available for recorded MP3 files.
 - All: Plays all tracks in all folders
 - Single: Plays only one track.
 - Folder: Plays files in the current folder

2. Repeat

- Within the range specified in the boundary, repeat playback can be set.

3. Shuffle

- Within the range specified in Boundary, random playback can be set.
- If enabled, files within the range are randomly played.

5. Display

1. Language

- Set the display language to use in iAUDIO U5.

2. Title

- Sets how the player displays file names on the screen.
- Choose ID3 tag to display tag information (artist, title) while playback.

3. Play Time

- Sets how it displays time information of current file.
- Play time shows elapsed playback time and Remaining shows the remaining playback time.

4. Scrollspeed

- Sets the scrolling speed for text displayed on the screen.
- Larger the number, faster the scrolling speed.

5. Auto Display Off

- Sets how long the screen stays on before it turns off.
- If there is no operation for a specified period of time, the screen will automatically turn off.

6. Brightness

- Sets the screen brightness

6. Timer

1. Time Setup

- Sets the current time
- Sets the correct time setting for alarm and scheduled recording.

2. Wakeup Mode

- Automatically turns on the player at the specified wakeup time.
- Music Alarm plays music and for FM Alarm settings, the last station to be listened to will run in Radio mode.
- For FM recording, it records the last radio frequency from the preset time during the specified time.

3. Wakeup Time

- Sets the time to automatically turn the player on.
- Once sets the alarm for one time use, Daily sets the alarm for daily use.
- Duration is the period of time during which the alarm will stay on.

4. 24Hour Display

- Displays clock in 24h format.

5. Sleep

- Automatically turns off the power after a specified time.
- After the preset time has passed, the player will automatically turn off even if a file is being played at the time.

6. Auto off

- When the player is stopped and no action is taken after a specified time has elapsed, this feature will automatically turn off the player.
- This function does not operate during playback.

7. General

1. Skip Length

- Sets the length of playback time skipped when the   buttons are pressed shortly.

2. Scan Speed

- Sets the speed of Fast Forward/Rewind when the   buttons are pressed and held.
- The faster the speed, the quicker scanning is possible.

3. Resume

- Saves the location of the music file played at the last power off.
- If enabled, when the player is turned on, it automatically plays from the last position where it was turned off.

4. Auto play

- Automatically plays files after the player is turned on.
- When enabled, the track last played will automatically start.
- When Resume is enabled, the player automatically plays from the last position.

5. Fade in

- Gradually increases volume when resuming playback after stop or pause.
- Sets how long it takes to increase the volume.

8. Recording

1. Voice bps

- Sets the audio quality of the file recorded with the built-in microphone.
- Files recording through the microphone are set to Mono by default.
- The higher Kbps, the better the recording quality is, but file size also becomes larger.

2. FM bps

- Sets the quality of the file being recorded during FM Radio listening.
- Also sets the quality of scheduled FM recording file.
- The higher Kbps, the better the recording quality is, but file size also becomes larger.

3. Mic Volume

- Adjusts the volume level of audio recorded through the built-in microphone

9. FM Radio

1. Stereo

- Select from Stereo and Mono when listening to FM Radio.
- Radio broadcasts that only support Mono will not support the Stereo feature.

2. Auto Scan

- Automatically scans for FM frequency channels and sets to preset channels.

3. Region

- Selects the country in which you are listening to FM radio

10. System

1. Load default setting

- Reconfigure all settings except for language to default.

2. USB Connection

- Available disk modes to choose from: MSC (Mass Storage Class) and MTP (Media Transfer Protocol)

3. Format

- Formats internal memory or HDS space. HDS (Hashed Data Structure) stores MS DRM10 related licensing information.

4. HDS Information

- Displays the usage of HDS. Consider Formatting HDS, if insufficient space is available.

11. Information

- Version : The current version of Firmware
- Total Space : Total memory capacity
- Free Space : Currently available memory capacity

1. Firmware Upgrade

Firmware is a program embedded in the hardware. By upgrading firmware, features of the product can be enhanced and any bugs be fixed. Performance and menus may change after a firmware upgrade. Some beta versions of firmware may contain program bugs that will be fixed in the later versions.

You can find the current firmware version of your player by selecting Settings-Information.

Upon upgrading the firmware, any data stored in the player may be lost, so it is recommended that data be backed up before upgrading the firmware.

The method of installing firmware may vary with each version. Be sure to check out further information regarding firmware on our website: www.COWON.com.

2. Resetting the Player to Factory Default Settings

iAUDIO U5's settings can be deleted and re-initialized to Factory default settings.

1. After the player is turned on, select the Music mode.
2. If a music file plays, pause at the playback screen and do as shown below.

3. When, initialized, the Language setting screen will appear when the player is turned on.

- If the player operates improperly, press the "RESET" button at the bottom of the player and then restart the player. If malfunction continues, please initialize the player to Factory Default setting.

Q I am still confused even after reading the manual.

A Our website www.COWON.com provides support for users of iAUDIO products with FAQ (Frequently Asked Questions) and beginner's guide for our products. Users are strongly encouraged to check out our website for further information regarding product usages and software upgrades and patches.
For individual inquiries, please contact us on-line as we will try to help you best we can.

Q I cannot turn on the player.

A Charge the battery fully in case the battery charge has been drained. If the battery is weak it may take a few seconds to power on. If the player does not respond at all, first disconnect all USB and power cables, and then press the RESET button located at the bottom of the player. RESET button simply powers off the player and does not affect the player in any other way.

Q Buttons won't work.

A Check to see if Power Switch is on HOLD position.

Q The player is on but there is no sound.

A Check if the volume is set to 0
Check if the player has any music file stored in its disk. Damaged music files may not play or play improperly. Check the connection of the earphones to the iAUDIO. Loose or blocked connection can cause inadequate contact between earphone jack and the iAUDIO.

Q Video won't play.

A iAUDIO U5 does not support video

Q FM Radio does not work.

A iAUDIO does not have a separate antenna. Instead it uses earphone wire to receive FM Radio signals. Stretching the wires may enhance the reception quality. FM reception quality may vary by location. If reception issue continues after multiple tries from different locations, please contact our online customer support (<http://www.COWON.com>).

Q There is too much noise in my recordings.

A iAUDIO U5 uses ultra-small embedded microphone, so it may be more susceptible to noise during recordings.

Q Characters on the display are corrupted.

A Reset the language using Settings-Display-Language menu and set display format to File name using Settings-Display-Title menu.

If the problem continues, reset the player to its Factory Default setting. Some special fonts may not display perfectly.

Q Computer cannot recognize the player when connected.

A When connecting to the PC with a USB cable, please turn the player on before connecting USB cable. If it is still not recognized by the PC, press RESET button next to the USB jack on the bottom of the player.

Connection to an external USB Hub may not be stable due to its low power. iAUDIO should be connected directly to a PC's USB port.

iAUDIO may require additional driver installation for Windows 98 users. See section 1.7

Q Player is not recognized by COWON MediaCenter - JetAudio and "No iAUDIO found" message appears.

A Check to see if the player is recognized in Windows Explorer when it is properly connected to PC. iAUDIO must be recognized in the Windows for it to work with COWON MediaCenter - JetAudio.

Additional driver installation is required for Windows 98 and 98 SE users. See section 1.7.

Within COWON MediaCenter - JetAudio, set Settings-Device to match your iAUDIO model.

Q Memory capacity of the player is different or smaller than specified.

A The memory capacity indicated by Windows Explorer may be different from that indicated by the memory manufacturer. iAUDIO uses some area in the drive for system operation. Therefore, the actual available capacity is somewhat reduced after excluding system area.

Q iAUDIO does not play properly when memory is full.

A For iAUDIO to function properly, it requires at least 5 MB of space for saving settings and other system files.
