iriver

iriver PT is introducing a new intuitive UI based PMP with
new-friendly, recyclable & reusable design to make your digital
information riches, with its built-in media converter, your favorite
movies is ready whenever you are.

Designed by iriver, manufactured in China
REP-PT60-1
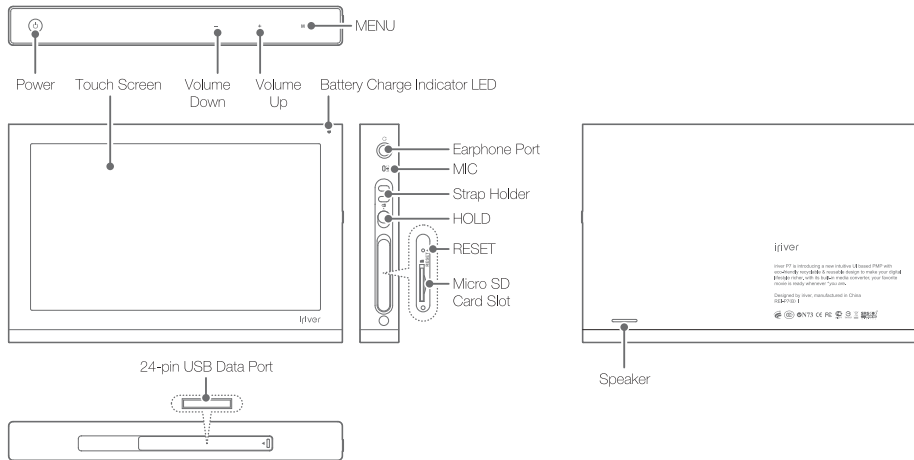

Installing Application

iriver plus 3 and Windows Media Player 11 are integrated software applications that efficiently manage various multimedia files. iriver plus 3 and Windows Media Player 11 give you freedom to transfer music, video and picture files from PC to the product.

Installing iriver plus 3

1. Insert the provided installation CD into your PC to display the application installation screen.

2. Click iriver plus 3 and complete the installation process by following the on-screen instructions

Installing Windows Media Player 11

1. Insert the installation CD into your PC to display the installation process screen.

2. Click Windows Media Player 11 and complete the installation process by following the on-screen instructions.

■ Minimum requirements for software applications:
- For Windows® 2000/XP
  - Intel® Pentium® I 233 MHz or higher processor speed   - 64 MB or greater memory   - 30 MB or greater hard disk space   - 16-bit enabled speaker and sound card
  - Microsoft Internet Explorer version 6.0 or later   - SVGA or higher resolution monitor (1024x768 resolution or greater)
- For Windows® Vista (Windows® Vista only supports the 32-bit version and does not support the 64-bit version.)
  - Intel® Pentium® I 800 MHz or higher processor speed   - 512 MB or greater memory   - 20 MB or greater hard disk space   - 16-bit enabled speaker and sound card
  - Microsoft Internet Explorer version 6.0 or later   - SVGA or higher resolution monitor (1024x768 resolution or greater)

■ For more information on using iriver plus 3, refer to pages 43-45.
■ For more information on using Windows Media Player 11, refer to pages 46~48.
■ To connect the product to iriver plus 3, select ✿ > Advanced > Connection Type and set to MSC and to connect the product to Windows Media Player 11, select ✿ > Advanced > Connection Type and set to MTP. (Refer to page 40.)

Chapter 02 Basic Operations

Turning the Product ON/OFF

Turning on the Product

1. Press the [◎] button on the product to turn it on.
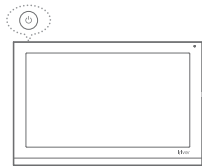

Turning off the Product

1. Press and hold the [◎] button on the product again to turn it off.

■ This product has an automatic power saving function to save battery power. Based on the settings in the Power Save mode, the product will automatically turn off after a pre-determined period without operation. For more information on setting this mode, please refer to [✿ > Timer > Auto Power OFF] (Refer to page 40.)

Touch Screen

Using the Touch Screen

1. The P7 has a touch screen system which operates according to the user's direct touch.
   Touch one of the icons displayed on the screen to operate.
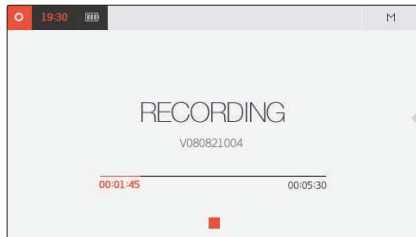

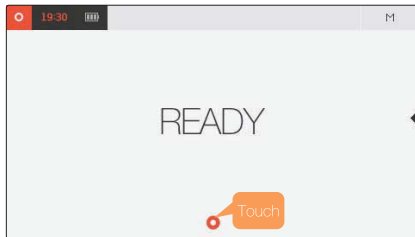

■ Do not press the touch screen with a sharp object or with excessive pressure because it may cause permanent damage on the screen.

Selecting Modes

Selection Mode

1. Turn on the power to display the main menu screen.

Touch the [**M**] icon during any mode to return to the main menu screen.

2. Touch a mode (Extra, Music, Video, Radio, Recording, Setting, Picture or Text) you want to operate.

Using HOLD and RESET

Using HOLD

1. Slide the HOLD switch in the direction of the arrow to lock the product.
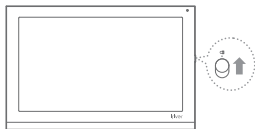

2. Slide the HOLD switch in the opposite direction of the arrow to unlock the product.

Using RESET

1. If your product does not respond, remove the Micro SD card cover and press and release the RESET pinhole.
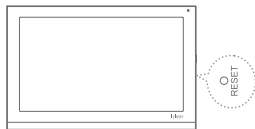

- The RESET function does not remove the date/time setting and data from your product.
- P7 will automatically turn off when you reset. Press the [⏻] button to turn P7 back on.

Connecting Your Device

Connecting Earphones

1. Connect your earphones to the Headphone port.
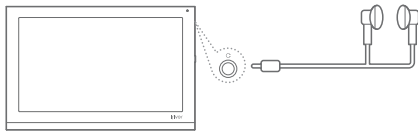

Charging the Product

1. Push and open the USB data port on P7 in the direction of the arrow.
2. Turn on your PC and connect P7 to it using the provided USB cable.
3. The internal battery automatically starts to charge.

- Do not use any USB cable other than the one included with the product. This may cause malfunction.
- Check if the product is connected to a high-power USB 2.0 port. Some low-power USB ports built into certain peripheral devices, such as keyboards and USB hubs without integrated power, may not provide enough power to charge your product.
- The product may not be charged while your PC is in standby mode.
- Charge the product only at room temperature.
  The product may not be charged in extremely hot or cold temperatures.
- The battery takes about 7 hours to be fully charged by a USB cable.
  (Based on when product is fully discharged and the power is off.)
- And about 5 hours by a TTA-certified 24-pin mobile charger.
  (Based on when product is fully discharged, power is off, and TTA charger is 750 mA.)
- The available usage time of a charged battery becomes shorter over time.
- It may take longer to fully charge your device or may not be fully charged if you use it while charging.

Connecting Your Device

Inserting/Removing the Micro SD Card

1. Open the cover of the RESET/Micro SD Card slot while the power of the product is off.

2. Place the Micro SD Card in the direction as shown in the image and slightly press and push the card into the slot.

3. Press again to remove the card.
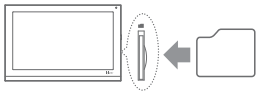

- Insert/remove the Micro SD Card while the power of the product is off.
- Do not insert the Micro SD Card with force.
  This may cause the product to malfunction or damage to the Micro SD Card.
- Do not remove the Micro SD Card while in use.
  This may cause data loss, product malfunction or damage to the Micro SD Card.
- Try not to insert and remove the Micro SD card frequently.
- Inserting the Micro SD card in the wrong way may cause product malfunction and the card may be difficult to remove.

Recommended Micro SD Card

Brand	SanDisk, Transcend

- Using a Micro SD Card other than the recommended card may cause malfunction.
- The transfer speed of the Micro SD Card may vary depending on your PC specifications.
- The Micro SD Card cannot be formatted through the product.
  The card can only be formatted with iriver plus 3 or a card reader.
- Formatting the Micro SD Card will delete all data within the card; therefore, it is important to backup data before formatting.
- FAT system is recommended when formatting the Micro SD Card.
- Please try to format the card if the Micro SD Card cannot be recognized or causes malfunction.
- The Micro SD Card is not included with the product. Please purchase one separately.
- A Micro SD Card of 8 GB is recommended for this product.

Connecting Your Device

Connecting P7 to Your PC

1. Push and open the USB data port on P7 in the direction of the arrow

2. Turn on your PC and P7, and then connect P7 to your PC using the provided USB cable.
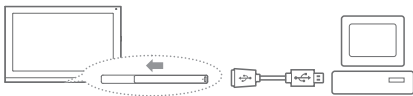

3. The USB Connection message will appear on the screen.
   - Power & Data Transfer: The product starts to charge and data can be transferred.
   - Power & Play: The product starts to charge and you can use the product.
   - Power Only: Charges the battery only.

   ■ It is recommended to stop all operations before connecting the product to your PC for optimum performance.
   ■ Check if the product is connected to a high-power USB 2.0 port. Some low-power USB ports built into certain peripheral devices, such as keyboards and USB hubs without integrated power, may cause the connection with your PC to be unstable.

Disconnecting P7 from Your PC

1. Click the Safely Remove Hardware icon on the taskbar to disconnect the product using the Safely Remove Hardware menu.
2. Click the OK button to confirm the device to remove.

   ■ The icon on the taskbar may be hidden in some operating systems such as Windows XP. Click the Show Hidden Icons to display the hidden icons.
   ■ The Safely Remove Hardware function may not be available while using some applications such as Windows Explorer or Windows Media Player. Close all applications before performing the Safely Remove Hardware function.
   ■ If the Safely Remove Hardware does not perform properly, try again after a few minutes. Removing the product without the process above, may cause data in the product memory to be damaged.

Connecting Your Device

Copying files/folders to P7

1. Select the files/folders to transfer in your PC and drag and drop to the drive that appears for the P7.

Deleting files/folders from P7

1. Select the files/folders to delete, and then, right-click your mouse and select Delete.

2. Click Yes in the Confirm File Delete/Confirm Folder Delete popup window to delete the files/folders.

- Always properly connect the product to the PC.
- While you transfer data, never disconnect it or turn off the power because it may cause serious damage to the internal memory of the product.
- Transfer speed may vary depending on your computer and/or OS environment.
- It is recommended to save media files using iriver plus 3 or Windows Media Player 11.

Chapter 03 Using P7

MUSIC

Selecting Music

1. In the main menu, touch [Music] to display the music playlist.

2. Scroll through the music list and touch a music file to play.

> ▪ Touch the [←] icon to move to the upper folder in the playlist.
> ▪ The browsed result will change based on the setting in [⚙ > Advanced > Music] Browse Type. (Refer to page 40.)
>   - Database: Browse files by My Playlists, All Music, Albums, Artists, Genres and My Rating.
>   - Folder: Browse music files by folder.
> ▪ If the [Music Browse Type] is set to [Database], touching [+] from the screen will add the music to your playlist and touching [−] will delete the selected music from your playlist.
> ▪ You can manage your playlist using iriver plus 3 or Windows Media Player 11.
> ▪ Supported file formats :
>   MP3 (8~320 Kbps), WMA (8~320 Kbps), OGG (Q1~Q10), FLAC, WAV

Playing Music

- While playing, touch the [+ / −] icon to control the volume.
- While playing, touch the [❙❙ / ▶] icon to pause or resume playback.
- While playing, touch the [◀◀ / ▶▶] icon to rewind or fast forward.
- While playing, touch the [◀◀ / ▶▶] icon to play the previous or next file.
- While playing, touch a specific position on the progress bar to play the music from that position.
- While playing, set the repeat loop by touching the [AB] icon to set point A and touch again to set Point B.
- The product will play the loop repeatedly. Touch the [AB] icon once again to deactivate the loop.
- While playing, touch the [▼] icon to save a bookmark.
  Press [▼] to display the bookmark list.
  - Touch [❮ / ❯] in the bookmark list screen to play the previous or next bookmark.
  - Touch the [🗑] icon in the bookmark list screen to delete the selected bookmark.
  - Touch the [🗑ALL] icon in the bookmark list screen to delete all bookmarks.

MUSIC

Music Play Screen

1. Additional Features: Displays additional features.
2. Title (filename): Displays the title (filename) of the music.

2. Touch the desired feature to set detailed features.

● Current City: Sets the current city to display on the screen.

● Global City: Sets the global city to display on the screen.

● Summer Time: Displays the summer time.

Chapter 04 Setting Up P7

Setup

You can configure your own settings in P7. The menu configurations are subject to change depending on different firmware versions.

Setup

1. In the main menu, touch [✿] to display the setting list.

2. Touch the desired setup item from the setting list to display sub items.

3. Touch the sub item to run and make adjustments. Adjustments will automatically be saved and will apply to the next operation.

Date & Time

● Sets the current date and time.

Display

● Brightness
  Adjusts the brightness of the screen.

● Touch Sound
  Turns the touch sound on and off.

● Touch Calibration
  Aligns the touch screen's coordinates for better display.

Setup

Timer

- Auto Power Off
  Automatically turns off the power after the specified
  time without operation.
- Backlight
  Sets a specified time for the backlight to turn off.

Advanced

- Music Browser
  Select how to browse through music files.
  - Database: Browses through music files transferred by iriver
    plus 3 or databases created by Rebuild Library using ID3 TAG
    or Playlist.
  - Folder: Browses through music files transferred by Windows
    Explorer.
  * Music Brower is set to Database by default.
- Rebuild Database
  Updates the data library of all files.
- Connection Type
  Selects the type for transferring file from / to PC.
  - MSC (UMS): Using iriver plus 3, transfers file using the MSC
    connection type.
  - MTP: Using Windows Media Player 11, transfers file with the
    MTP connection type.

Setup

Language

- Menu Language
  Selects the language for on-screen display

- Country
  Select the language for ID3 tag and text by country.

System Information

- Version
  Displays the version number of the current firmware.

- Reset All Settings
  Resets the product to the factory setting.

- Internal Memory
  Displays the used and total memory space.

Using iriver plus 3

Adding Media to Library

1. When you run iriver plus 3 for the first time, the Add Media Wizard will start.

2. Follow the on-screen instructions on the PC to add media files such as music, picture, and video to the library.

Ripping Songs from a CD

1. Insert an audio CD into the CD drive and run iriver plus 3.

2. In iriver plus 3, select the checkbox from Music > CD Drive and click CD Ripping in bottom left.

3. After ripping song, select the All Music to check whether the ripped song is added to the library.

Using iriver plus 3

Transferring Media to P7

● Using iriver plus 3

1. Connect the product to the USB jack of your PC and run iriver plus 3.

2. Select the checkbox beside the file to transfer and click [⊙].

3. The selected file starts to transfer and the progress status is displayed in the Status window on bottom left.

4. Now you can find the selected music in your library.

● Using Windows Explorer

1. Connect the product to the USB jack of your PC.

2. Copy the contents to proper folders as below.
   Music: IRIVER P7/Music
   Video: IRIVER P7/Video
   Picture: IRIVER P7/Pictures
   Text: IRIVER P7/Text

■ To play music files transferred by Windows Explorer, follow the steps below.
: In [⚙] > Advanced > Music Browser Type, set the type to Folder Tree and browse the file in the music file list.
: In [⚙] > Advanced > Music Browser Type, set the type to Database and then rebuild database from [⚙] > Advanced > Rebuild Database or use Database Update from iriver plus 3. Now browse the file in the music file list.

Using iriver plus 3

Initializing Disk

1. Connect P7 to the USB port of your PC and run iriver plus 3.

2. Select Tools > Portable Device > Initialize Disk and click Start when the initialization confirmation message appears.

3. When the initialization process is completed, a completion notice will appear, then you can disconnect your P7 from your PC.

Upgrading Firmware

1. Connect P7 to the USB port of a PC with Internet access and run iriver plus 3.

2. Select Tools > Portable Device > Firmware Upgrade and complete the upgrade process by following the on-screen instructions.

- You need to backup the necessary files before initialization, since formatted files cannot be recovered.
- It is recommended to use the format feature within the product for formatting.

- Do not disconnect the product from PC while downloading firmware upgrade file.
- Once the download is completed, disconnect the product to activate the firmware upgrade.
- If the existing firmware is the latest version, a message to confirm that the installed version is the latest will appear. A message will automatically appear on screen when connecting the product to your PC and the firmware version is the latest.

Using Windows Media Player 11

Adding Media to Library

1. When you run Windows Media Player 11, the Add Media Wizard will start.

2. Follow the on-screen instructions on the PC to add media files such as music and picture to the library.

Ripping Songs from a CD

1. Insert an audio CD into the CD drive and run Windows Media Player 11.

2. Select the Ripping tab on the Windows Media Player 11. Select the checkbox from and click the Start Ripping in the bottom left.

3. The ripped music will be stored in My Documents > My Music and automatically added to library.

Using Windows Media Player 11

Transferring Media to the Product

1. Connect the product to the USB jack of your PC and run Windows Media Player 11.

2. After selecting the file in your PC, drag & drop it to the right pane.

3. Click Start Sync in the bottom left to start transferring.

4. Now you can find the selected music in your library.

Using Windows Media Player 11

Initializing Disk

1. Connect the product to the USB jack of your PC and run Windows Media Player 11.

2. After selecting IRIVER P7, click the right mouse button and select Format. Click OK when the message to confirm initialization appears.

3. The initialization process is completed and the product is disconnected from your PC.

1. Connect the product to the USB jack of your PC.

2. Run iriver Firmware Updater application in the installation CD and complete the upgrade process by following the on-screen instructions.

- You need to backup the necessary files before initialization, since formatted files cannot be recovered.
- It is recommended to use the format function integrated in the P7.

- Do not disconnect the product from PC while upgrading firmware.

Federal Communications Commission

FCC RF

- CAUTION :
  Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- CAUTION : Exposure to Radio Frequency Radiation. Antenna shall be mounted in such a manner to minimize the portential for human contact during normal operation.
  The antenna should not be contacted during operation to avoid the possibility of exceeding the FCC radio frequency exposure limit.
- This device complies with part 15 of the FCC Rules.
- Operation is subject to the following two Conditions :
  (1) This device may not cause harmful interference, and
  (2) this device must accept any interference received, including interference that may cause undesired operation. for compliance could void the user's authority to operate the equipment.

SAFETY

- CAUTION
  RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
  DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

  ■ This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Riles. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to correct the interference by one or more of the following measures:
    - Reorient or relocate the receiving antenna.
    - Increase the separation between the equipment and receiver.
    - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
    - Consult the dealer or an experienced radio/TV technician for help.
